365 black history facts: Black History Should Be Taught 365 Days A Year Jasper Cephus, 2021-06-08 Black history is unknown to so many people, just me alone cannot reach them all with my book. Black humans have more historical information than any other people in the world. The study of Black history has become a branch of knowledge that feeds the world religious and spiritual life. Control media use deceptive words or actions to coverup the truth about Black history. There have been intentional destructions of ancient Black historical statues, art, and documents written in stone. Fortunately, some of the Black history survived and that proved much of Black history is hidden, then falsely recreated in the images of white people. This is damaging to the young Black and White children. 1. White children are living a false sense of superiority complex for life. 2. Black children living, haven their identity stolen from them is psychologically depressing. I wrote this book to heighten the awareness around the world what has been done around to over 150,000 years of civilized Black history. 1. recreating ancient statues in the images of white people. 2. Changing the color of ancient art . 3. Stop defacing ancient statues. 4 Remove racist lies in the good book. That is why I wrote: Black History Should Be 365 Days A Year.

365 black history facts: Before the Mayflower Lerone Bennett, 2018-08-09 This book grew out of a series of articles which were published originally in Ebony magazine. The book, like the series, deals with the trials and triumphs of a group of Americans whose roots in the American soil are deeper than those of the Puritans who arrived on the celebrated "Mayflower" a year after a "Dutch man of war" deposited twenty Negroes at Jamestown. This is a history of "the other Americans" and how they came to North America and what happened to them when they got here. The story begins in Africa with the great empires of the Sudan and Nile Valley and ends with the Second Reconstruction which Martin Luther King, Jr., and the "sit-in" generation are fashioning in the North and South. The story deals with the rise and growth of slavery and segregation and the continuing efforts of Negro Americans to answer the question of the Jewish poet of captivity: "How shall we sing the Lord's song in a strange land?" This history is founded on the work of scholars and specialists and is designed for the average reader. It is not, strictly speaking, a book for scholars; but it is as scholarly as fourteen months of research could make it. Readers who would like to follow the story in greater detail are urged to read each chapter in connection with the outline of Negro history in the appendix.

365 black history facts: *Race and the Writing of History* Maghan Keita, 2000-11-30 Despite increased interest in recent years in the role of race in Western culture, scholars have neglected much of the body of work produced in the nineteenth and twentieth centuries by black intellectuals. For example, while DuBois' thoughts about Africa may be familiar to contemporary academics, those of his important precursors and contemporaries are not widely known. Similarly, although contemporary figures such as Martin Bernal, Molefi Assante, and other Afrocentrists are the subject of heated debate, such debates are rarely illuminated by an awareness of the traditions that preceded them. *Race and The Writing of History* redresses this imbalance, using Bernal's *Black Athena* and its critics as an introduction to the historical inquiries of African-American intellectuals and many of their African counterparts. Keita examines the controversial legacy of writing history in America and offers a new perspective on the challenge of building new historiographies and epistemologies. As a result, this book sheds new light on how ideas about race and racism have shaped the stories we tell about ourselves.

365 black history facts: *The Fortney Encyclical Black History* Albert Fortney Jr., 2016-01-15
The Encyclical Black History has been created for the critical and lack of vital Afro-Centric Multi-Curriculum text in urban school systems and is a necessity for African Americans. This book was created with careful and serious attention to biographical names that identifies history, culture as well as biblical characters. The reason why of this encyclical history can be explained with the facts and proof/evidence of the following. The point that has socio-psychological implications at the unconscious as well as the conscious level is the great little white racist lie, seen long enough, becomes the truth; like, portraying a white Jesus Christ who was a black man. Dr. Alvin Poussaint, a Black psychiatrist associated with Harvard University and others have observed and explained the most tragic part of all of this is that the African American has come to form his self image and self-concept on the basis of what white racists have laid down as a guide or prescribed. Therefore, black men and women learn quickly to hate themselves and each other more than their white oppressor. There is almost infinite evidence that racism has left almost irreparable scars on the psyche of Afro-Americans that burden with an unrelenting, painful anxiety that drives the psyche to reach out for a sense of identity and self-esteem. Poussaint and others say that black children, especially learn to hate themselves at very early ages. Studies reveal their preference for white dolls over black ones. One study reported that black children in their drawings tend to show blacks as small, incomplete people and whites as strong and powerful. To conclude, in western color symbolism white is positive and black negative. Many people might ask why the contributions of Africa should be included in American curriculum? Is because they bleach and still rob black history and culture with black pictured as white that lie, leaves us mentally-dead, angry, and without purpose, of where we are going! Human culture is the product of all humanity, not the possession of a single racial or ethnic group. Afro-centric Multicultural educations major aim is to close the gap between Western ideals of equality, justice and practices that contradict these ideas. Stereotype people of color and people who are poor have just about no opportunities to become free of perspectives that are monoculture, that devalue African culture victimize them mostly having an inability to fully, function effectively in society. Many of these problems could be miraculously remedied with astonishing results if explained of black scientific achievements, which occurred in black Africa. There are also white African Americans living in the U.S.A. besides black African Americans, should make the distinction. Carl Sandburg (1979) related a dialogue between a white American and an American Indian which illustrates the need for multicultural education: The white man drew a small circle in the sand and told the red man, This is what the Indian knows, and drawing a big circle around the small one, this is what is what the white man knows. The Indian then

took the stick and swept an immensely big ring around both circles and said, this is where the white man and the red man knows nothing.

365 black history facts: The Book of Harlan Bernice L. McFadden, 2016-04-11 Bernice L. McFadden has been named the Go On Girl! Book Club's 2018 Author of the Year WINNER of the 2017 American Book Award WINNER of the NAACP Image Award for Outstanding Literary Work (Fiction) 2017 Hurston/Wright Legacy Award Nominee (Fiction)! A Washington Post Notable Book of 2016 McFadden uses the experiences of her own ancestors as loose inspiration for the life of Harlan, whom she portrays from his childhood in Harlem through imprisonment in a Nazi concentration camp and his struggles afterward to put his life back together. --Library Journal Simply miraculous...As her saga becomes ever more spellbinding, so does the reader's astonishment at the magic she creates. This is a story about the triumph of the human spirit over bigotry, intolerance and cruelty, and at the center of *The Book of Harlan* is the restorative force that is music. --Washington Post Bernice L. McFadden took me on a melodious literary journey through time and place in her masterpiece, *The Book of Harlan*. It's complex, real, and raw...McFadden intricately and purposefully weaves history as a backdrop in her fiction. *The Book of Harlan* brilliantly explores questions about agency, purpose, freedom, and survival. --Literary Hub, one of Nicole Dennis-Benn's 26 Books From the Last Decade that More People Should Read McFadden's writing breaks the heart--and then heals it again. The perspective of a black man in a concentration camp is unique and harrowing and this is a riveting, worthwhile read. --Toronto Star *The Book of Harlan* is an incredible read. Bernice McFadden...has created an amazing novel that speaks to lesser known aspects of the African-American experience and illuminates the human heart and spirit. Her spare prose is rich in details that convey deep emotions and draw the reader in. This fictional narrative of Harlan Elliot's life is firmly grounded amidst real people and places--prime historical fiction, and the best book I have read this year. --Historical Novels Review, Editors' Choice McFadden packs a powerful punch with tight prose and short chapters that bear witness to key events in early twentieth-century history: both World Wars, the Great Depression, and the Great Migration. Partly set in the Jim Crow South, the novel succeeds in showing the prevalence of racism all across the country--whether implemented through institutionalized mechanisms or otherwise. Playing with themes of divine justice and the suffering of the righteous, McFadden presents a remarkably crisp portrait of one average man's extraordinary bravery in the face of pure evil. --Booklist, Starred review *The Book of Harlan* opens with the courtship of Harlan's parents and his 1917 birth in Macon, Georgia. After his prominent minister grandfather dies, Harlan and his parents move to Harlem, where he eventually becomes a professional musician. When Harlan and his best friend, trumpeter Lizard Robbins, are invited to perform at a popular cabaret in the Parisian enclave of Montmartre--affectionately referred to as The Harlem of Paris by black American musicians--Harlan jumps at the opportunity, convincing Lizard to join him. But after the City of Light falls under Nazi occupation, Harlan and Lizard are thrown into Buchenwald--the notorious concentration camp in Weimar, Germany--irreparably changing the course of Harlan's life. Based on exhaustive research and told in McFadden's mesmeric prose, *The Book of Harlan* skillfully blends the stories of McFadden's familial ancestors with those of real and imagined characters.

365 black history facts: In the Shadow of Slavery Judith Carney, 2011-02-01 The transatlantic slave trade forced millions of Africans into bondage. Until the early nineteenth century, African slaves came to the Americas in greater numbers than Europeans. *In the Shadow of Slavery* provides a startling new assessment of the Atlantic slave trade and upends conventional wisdom by shifting attention from the crops slaves were forced to produce to the foods they planted for their own nourishment. Many familiar foods—millet, sorghum, coffee, okra, watermelon, and the Asian long bean, for example—are native to Africa, while commercial products such as Coca Cola, Worcestershire Sauce, and Palmolive Soap rely on African plants that were brought to the Americas

on slave ships as provisions, medicines, cordage, and bedding. In this exciting, original, and groundbreaking book, Judith A. Carney and Richard Nicholas Rosomoff draw on archaeological records, oral histories, and the accounts of slave ship captains to show how slaves' food plots—botanical gardens of the dispossessed—became the incubators of African survival in the Americas and Africanized the foodways of plantation societies.

365 black history facts: Dreams of a More Perfect Union Rogan Kersh, 2013-06-04 In a brilliantly conceived and elegantly written book, Rogan Kersh investigates the idea of national union in the United States. For much of the period between the colonial era and the late nineteenth century, he shows, union was the principal rhetorical means by which Americans expressed shared ideals and a common identity without invoking strong nationalism or centralized governance. Through his exploration of how Americans once succeeded in uniting a diverse and fragmented citizenry, Kersh revives a long-forgotten source of U.S. national identity. Why and how did Americans perceive themselves as one people from the early history of the republic? How did African Americans and others at the margins of U.S. civic culture apply this concept of union? Why did the term disappear from vernacular after the 1880s? In his search for answers, Kersh employs a wide range of methods, including political-theory analysis of writings by James Madison, Frederick Douglass, and Abraham Lincoln and empirical analysis drawing on his own extensive database of American newspapers. The author's findings are persuasive—and often surprising. One intriguing development, for instance, was a strong resurgence of union feelings among Southerners—including prominent former secessionists—after the Civil War. With its fascinating and novel approach, *Dreams of a More Perfect Union* offers valuable insights about American political history, especially the rise of nationalism and federalism. Equally important, the author's close retracing of the religious, institutional, and other themes coloring the development of unionist thought unveils new knowledge about the origination and transmittal of ideas in a polity.

365 black history facts: We Could Not Fail Richard Paul, Steven Moss, 2015-05-01 The Space Age began just as the struggle for civil rights forced Americans to confront the long and bitter legacy of slavery, discrimination, and violence against African Americans. Presidents John F. Kennedy and Lyndon Johnson utilized the space program as an agent for social change, using federal equal employment opportunity laws to open workplaces at NASA and NASA contractors to African Americans while creating thousands of research and technology jobs in the Deep South to ameliorate poverty. *We Could Not Fail* tells the inspiring, largely unknown story of how shooting for the stars helped to overcome segregation on earth. Richard Paul and Steven Moss profile ten pioneer African American space workers whose stories illustrate the role NASA and the space program played in promoting civil rights. They recount how these technicians, mathematicians, engineers, and an astronaut candidate surmounted barriers to move, in some cases literally, from the cotton fields to the launching pad. The authors vividly describe what it was like to be the sole African American in a NASA work group and how these brave and determined men also helped to transform Southern society by integrating colleges, patenting new inventions, holding elective office, and reviving and governing defunct towns. Adding new names to the roster of civil rights heroes and a new chapter to the story of space exploration, *We Could Not Fail* demonstrates how African Americans broke the color barrier by competing successfully at the highest level of American intellectual and technological achievement.

Then one otherwise-ordinary morning, Tunde's mother wakes him with a hug, bundles him and his baby brother into the car, and takes them away from the only home they've ever known. But running away doesn't bring her, or her children, any relief; once Tunde's father tracks them down, she flees to Nigeria, and Tunde never feels at home again. He

spends the rest of his childhood and young adulthood searching for connection—to the wary stepmother and stepbrothers he gains when his father remarries; to the Utah residents who mock his father's accent; to evangelical religion; to his Texas middle school's crowd of African-Americans; to the fraternity brothers of his historically black college. In so doing, he discovers something that sends him on a journey away from everything he has known. Sweeping, stirring, and perspective-shifting, *A Particular Kind of Black Man* is “wild, vulnerable, lived...A study of the particulate self, the self as a constellation of moving parts” (The New York Times Book Review).

365 black history facts: *Black Fortunes* Shomari Wills, 2018-01-30 “By telling the little-known stories of six pioneering African American entrepreneurs, *Black Fortunes* makes a worthy contribution to black history, to business history, and to American history.”—Margot Lee Shetterly, New York Times Bestselling author of *Hidden Figures* Between the years of 1830 and 1927, as the last generation of blacks born into slavery was reaching maturity, a small group of industrious, tenacious, and daring men and women broke new ground to attain the highest levels of financial success. Mary Ellen Pleasant, used her Gold Rush wealth to further the cause of abolitionist John Brown. Robert Reed Church, became the largest landowner in Tennessee. Hannah Elias, the mistress of a New York City millionaire, used the land her lover gave her to build an empire in Harlem. Orphan and self-taught chemist Annie Turnbo-Malone, developed the first national brand of hair care products. Mississippi school teacher O. W. Gurley, developed a piece of Tulsa, Oklahoma, into a “town” for wealthy black professionals and craftsmen that would become known as “the Black Wall Street.” Although Madam C. J Walker was given the title of America's first female black millionaire, she was not. She was the first, however, to flaunt and openly claim her wealth—a dangerous and revolutionary act. Nearly all the unforgettable personalities in this amazing collection

were often attacked, demonized, or swindled out of their wealth. *Black Fortunes* illuminates as never before the birth of the black business titan.

365 black history facts: *Black Wings* William J. Powell, 2024-01-30 *Black Wings*, published in 1934 during the Great Depression, is the autobiography of black aviation pioneer, engineer, and entrepreneur William Powell. In 1917 he enlisted in officer training school and served in a segregated unit during World War I. During the war Powell was gassed by the enemy, and he suffered health problems throughout his life from this poison gas attack. After the war Powell opened service stations in Chicago. He became interested in aviation, but the only school that would train him was located in Los Angeles. He sold his businesses in Chicago and moved to the West Coast. After receiving his pilot's license in 1932, Powell set out to motivate other African Americans to pursue a career in aviation. Powell eventually opened an all-black flight school, produced a movie, published monthly journals, offered scholarships to young African Americans, and founded the first African American owned airplane manufacturer. Powell died in 1942.

365 black history facts: *The Dutch Republic and the Birth of Modern Advertising* Arthur der Weduwen, Andrew Pettegree, 2019-12-16 With the birth of a serial press in the seventeenth century, the introduction of paid advertising was the most crucial step in pointing the newspaper industry towards a sustainable future. Here, as in so much else, the laboratory of invention was the seventeenth-century Dutch Republic. In this study, based on an exhaustive examination of the first six thousand advertisements placed in Dutch newspapers between 1620 and 1675, Arthur der Weduwen and Andrew Pettegree chart the growth of advertising from an adjunct to the book industry, advertising newly published titles, to a broad reflection of a burgeoning consumer society. Businesses and private citizens used the newspapers to offer a wide range of goods and services, publicise new inventions, or appeal for help in recovering lost and stolen goods, pets or children. In these evocative, colourful and sometimes deeply moving notices, we see the beginnings of marketing strategies that would characterise the advertising world over the following centuries, and into the modern era.
