Vocational Training Provider NYT: Finding the Right Path to Your Career Success

Are you searching for a fulfilling career but feel lost in the maze of educational options? The New York Times frequently highlights the growing demand for skilled workers and the crucial role vocational training plays in filling this gap. This post acts as your comprehensive guide to navigating the world of vocational training providers in the NYT's coverage area, helping you find the perfect program to launch your career. We'll explore various provider types, factors to consider when choosing a program, and resources to aid your search. Let's unlock your potential!

Understanding the NYT's Perspective on Vocational Training

The New York Times, a leading source of news and information, frequently publishes articles addressing the skills gap and the importance of vocational training. These articles often highlight the success stories of individuals who have benefited from vocational programs, showcasing the tangible impact of practical skills training on employment prospects and economic mobility. Understanding this perspective is crucial because it underscores the legitimacy and growing importance of vocational training as a viable career pathway.

Types of Vocational Training Providers Featured (or Implied) in NYT Coverage

The NYT's coverage isn't always explicitly focused on naming specific providers, but we can extrapolate common types based on their reporting:

1. Community Colleges: These institutions often receive significant attention for their affordable and accessible vocational programs, offering certificates and associate degrees in high-demand fields like healthcare, technology, and skilled trades. The NYT often highlights their role in providing pathways for individuals from diverse backgrounds.

2. Trade Schools and Vocational Schools: These specialized institutions focus on hands-on training in specific trades, such as plumbing, electrical work, welding, and carpentry. NYT articles implicitly acknowledge their contribution to the skilled labor force, often mentioning the increasing demand for these professionals.

3. Apprenticeship Programs: These programs, often partnered with businesses, combine on-the-job training with classroom instruction, providing a valuable combination of practical experience and theoretical knowledge. The NYT frequently discusses the success of apprenticeship programs in bridging the skills gap.

4. Online Vocational Training Platforms: With the rise of online learning, NYT coverage indirectly acknowledges the increasing role of online platforms offering vocational training courses and certifications. These platforms offer flexibility and accessibility to individuals who may not have traditional access to in-person programs.

Key Factors to Consider When Choosing a Vocational Training Provider

Choosing the right vocational training provider is a crucial decision. Here are some key factors to prioritize:

1. Accreditation and Licensing: Ensure the provider is accredited by a reputable organization and holds the necessary licenses to operate. This guarantees the quality and legitimacy of the program.

2. Program Curriculum and Outcomes: Carefully review the curriculum to ensure it aligns with your career goals. Investigate the program's job placement rate and graduate success stories.

3. Instructor Expertise and Experience: Experienced and knowledgeable instructors are crucial for effective learning. Look for providers with instructors who have real-world experience in their respective fields.

4. Cost and Financial Aid Options: Vocational training can vary significantly in cost.

Investigate financial aid options, scholarships, and payment plans to find a program that fits your budget.

5. Location and Accessibility: Consider the location of the provider and its accessibility, including transportation options, online learning availability, and scheduling flexibility.

Resources to Aid Your Search for a Vocational Training Provider in the NYT Area

While the NYT doesn't maintain a specific directory of vocational training providers, several resources can assist your search:

The New York State Department of Labor: This agency provides valuable information on in-demand occupations and links to training resources.

Local Community Colleges: Check the websites of community colleges in your area for their vocational programs.

Online Vocational Training Platforms: Research reputable online platforms offering accredited vocational training courses.

Professional Associations: Look into professional associations related to your chosen field. They often provide resources and information on training programs.

Conclusion

Finding the right vocational training provider is a significant step toward career success. By carefully considering the factors discussed above and utilizing the available resources, you can make an informed decision that aligns with your aspirations and sets you on the path to a fulfilling career. Remember to leverage the insights from the New York Times' coverage on the skills gap and the importance of vocational training to guide your choices. Your future career is within reach!

FAQs

1. Are vocational training programs only for high school graduates? No, vocational training programs are available to individuals of all ages and educational backgrounds. Many programs cater to adults looking for career changes or skill enhancements.

2. How long do vocational training programs typically last? The duration varies widely depending on the program and the specific skills being taught. Some programs can be completed in a few months, while others may take a year or more.

3. What are the job prospects after completing a vocational training program? Job prospects depend on the specific field and the quality of the training received. However, many vocational programs boast high job placement rates due to the growing demand for skilled workers.

4. Is financial aid available for vocational training? Yes, many vocational training programs offer financial aid options, including grants, scholarships, and loans. Explore your eligibility with the provider and relevant government agencies.

5. How can I verify the legitimacy of a vocational training provider? Check for accreditation from reputable organizations and verify their licensing with the appropriate authorities. Online reviews and testimonials can also provide valuable insight.

vocational training provider nyt: Fargo Rock City Chuck Klosterman, 2012-12-11 The year is 1983, and Chuck Klosterman just wants to rock. But he's got problems. For one, he's in the fifth grade. For another, he lives in rural North Dakota. Worst of all, his parents aren't exactly down with the long hairstyle which rocking requires. Luckily, his brother saves the day when he brings home a bit of manna from metal heaven, SHOUT AT THE DEVIL, Motley Crue's seminal paean to hair-band excess. And so Klosterman's twisted odyssey begins, a journey spent worshipping at the heavy metal altar of Poison, Lita Ford and Guns N' Roses. In the hilarious, young-man-growing-up-with-a-soundtrack-tradition, FARGO ROCK CITY chronicles Klosterman's formative years through the lens of heavy metal, the irony-deficient genre that, for better or worse, dominated the pop charts throughout the 1980s. For readers of Dave Eggers, Lester Bangs, and Nick Hornby, Klosterman delivers all the goods: from his first dance (with a girl) and his eye-opening trip to Mandan with the debate team; to his list of 'essential' albums; and his thoughtful analysis of the similarities between Guns 'n' Roses' 'Lies' and the gospels of the New Testament.

vocational training provider nyt: Reskilling America Katherine S. Newman, Hella Winston, 2016-04-19 From Katherine Newman, award-winning author of No Shame in My Game, and sociologist Hella Winston, a sharp and irrefutable call to reenergize this nation's long-neglected system of vocational training After decades of off-shoring and downsizing that have left blue collar workers obsolete and stranded, the United States is now on the verge of an industrial renaissance. But we don't have a skilled enough labor pool to fill the positions that will be created, which are in many cases technically demanding and require specialized skills. A decades-long series of idealistic educational policies with the expressed goal of getting every student to go to college has left a generation of potential workers out of the system. Touted as a progressive, egalitarian institution providing opportunity even to those with the greatest need, the American secondary school system has in fact deepened existing inequalities. We can do better, argue acclaimed sociologists Katherine Newman and Hella Winston. Taking a page from the successful experience of countries like Germany and Austria, where youth unemployment is a mere 7%, they call for a radical reevaluation of the idea of vocational training, long discredited as an instrument of tracking. The United States can prepare a new, high-performance labor force if we revamp our school system to value industry apprenticeship and rigorous technical education. By doing so, we will not only be able to meet the growing demand for skilled employees in dozens of sectors where employers decry the absence of well trained workers -- we will make the American Dream accessible to all.

vocational training provider nyt: The Last Professors Frank Donoghue, 2008 Taking a clear-eyed look at American higher education over the last twenty years, Donoghue outlines a web of forces--social, political, and institutional--dismantling the professoriate. Today, fewer than 30 percent of college and university teachers are tenured or on tenure tracks, and signs point to a future where professors will disappear. --from publisher description.

vocational training provider nyt: The Once and Future Worker Oren Cass, 2018-11-13 "[Cass's] core principle—a culture of respect for work of all kinds—can help close the gap dividing

the two Americas....” – William A. Galston, The Brookings Institution The American worker is in crisis. Wages have stagnated for more than a generation. Reliance on welfare programs has surged. Life expectancy is falling as substance abuse and obesity rates climb. These woes are not the inevitable result of irresistible global and technological forces. They are the direct consequence of a decades-long economic consensus that prioritized increasing consumption—regardless of the costs to American workers, their families, and their communities. Donald Trump’s rise to the presidency focused attention on the depth of the nation’s challenges, yet while everyone agrees something must change, the Left’s insistence on still more government spending and the Right’s faith in still more economic growth are recipes for repeating the mistakes of the past. In this groundbreaking re-evaluation of American society, economics, and public policy, Oren Cass challenges our basic assumptions about what prosperity means and where it comes from to reveal how we lost our way. The good news is that we can still turn things around—if the nation’s proverbial elites are willing to put the American worker’s interests first. Which is more important, pristine air quality, or well-paying jobs that support families? Unfettered access to the cheapest labor in the world, or renewed investment in the employment of Americans? Smoothing the path through college for the best students, or ensuring that every student acquires the skills to succeed in the modern economy? Cutting taxes, expanding the safety net, or adding money to low-wage paychecks? The renewal of work in America demands new answers to these questions. If we reinforce their vital role, workers supporting strong families and communities can provide the foundation for a thriving, self-sufficient society that offers opportunity to all.

vocational training provider nyt: The Mind at Work Mike Rose, 2005-07-26 Featuring a new preface for the 10th anniversary As did the national bestseller Nickel and Dimed, Mike Rose’s revelatory book demolishes the long-held notion that people who work with their hands make up a less intelligent class. He shows us waitresses making lightning-fast calculations, carpenters handling complex spatial mathematics, and hairdressers, plumbers, and electricians with their aesthetic and diagnostic acumen. Rose, an educator who is himself the son of a waitress, explores the intellectual repertory of everyday workers and the terrible social cost of undervaluing the work they do. Deftly combining research, interviews, and personal history, this is one of those rare books that has the capacity both to shape public policy and to illuminate general readers.

vocational training provider nyt: The Cult of Smart Fredrik deBoer, 2020-08-04 Named one of Vulture’s Top 10 Best Books of 2020! Leftist firebrand Fredrik deBoer exposes the lie at the heart of our educational system and demands top-to-bottom reform. Everyone agrees that education is the key to creating a more just and equal world, and that our schools are broken and failing. Proposed reforms variously target incompetent teachers, corrupt union practices, or outdated curricula, but no one acknowledges a scientifically-proven fact that we all understand intuitively: Academic potential varies between individuals, and cannot be dramatically improved. In The Cult of Smart, educator and outspoken leftist Fredrik deBoer exposes this omission as the central flaw of our entire society, which has created and perpetuated an unjust class structure based on intellectual ability. Since cognitive talent varies from person to person, our education system can never create equal opportunity for all. Instead, it teaches our children that hierarchy and competition are natural, and that human value should be based on intelligence. These ideas are counter to everything that the left believes, but until they acknowledge the existence of individual cognitive differences, progressives remain complicit in keeping the status quo in place. This passionate, voice-driven manifesto demands that we embrace a new goal for education: equality of outcomes. We must create a world that has a place for everyone, not just the academically talented. But we’ll never achieve this dream until the Cult of Smart is destroyed.

vocational training provider nyt: International Competition in Services , 1987

vocational training provider nyt: Eichmann in Jerusalem Hannah Arendt, 2006-09-22 The controversial journalistic analysis of the mentality that fostered the Holocaust, from the author of The Origins of Totalitarianism Sparking a flurry of heated debate, Hannah Arendt’s authoritative and stunning report on the trial of German Nazi leader Adolf Eichmann first appeared as a series of

articles in The New Yorker in 1963. This revised edition includes material that came to light after the trial, as well as Arendt's postscript directly addressing the controversy that arose over her account. A major journalistic triumph by an intellectual of singular influence, Eichmann in Jerusalem is as shocking as it is informative—an unflinching look at one of the most unsettling (and unsettled) issues of the twentieth century.

vocational training provider nyt: The Second Machine Age: Work, Progress, and Prosperity in a Time of Brilliant Technologies Erik Brynjolfsson, Andrew McAfee, 2014-01-20 The big stories -- The skills of the new machines : technology races ahead -- Moore's law and the second half of the chessboard -- The digitization of just about everything -- Innovation : declining or recombining? -- Artificial and human intelligence in the second machine age -- Computing bounty -- Beyond GDP -- The spread -- The biggest winners : stars and superstars -- Implications of the bounty and the spread -- Learning to race with machines : recommendations for individuals -- Policy recommendations -- Long-term recommendations -- Technology and the future (which is very different from technology is the future).

vocational training provider nyt: There Is Life After College Jeffrey J. Selingo, 2016-04-12 From the bestselling author of College Unbound comes a hopeful, inspiring blueprint to help alleviate parents' anxiety and prepare their college-educated child to successfully land a good job after graduation. Saddled with thousands of dollars of debt, today's college students are graduating into an uncertain job market that is leaving them financially dependent on their parents for years to come—a reality that has left moms and dads wondering: What did I pay all that money for? There Is Life After College offers students, parents, and even recent graduates the practical advice and insight they need to jumpstart their careers. Education expert Jeffrey Selingo answers key questions—Why is the transition to post-college life so difficult for many recent graduates? How can graduates market themselves to employers that are reluctant to provide on-the-job training? What can institutions and individuals do to end the current educational and economic stalemate?—and offers a practical step-by-step plan every young professional can follow. From the end of high school through college graduation, he lays out exactly what students need to do to acquire the skills companies want. Full of tips, advice, and insight, this wise, practical guide will help every student, no matter their major or degree, find real employment—and give their parents some peace of mind.

vocational training provider nyt: They Don't Teach Corporate in College Alexandra Levit, 2019 A guidebook to help people make smart career moves right out of college; land a dream job; establish a strong business reputation; navigate their organization's social scene through networking; and more--

vocational training provider nyt: Fieldwork Mischa Berlinski, 2009-05-01 Shortlisted for the National Book Award for Fiction Set in Thailand, a brilliantly original and page-turning first novel of anthropologists, missionaries, demon possession, sexual taboos, murder, and one obsessed young American reporter. When his girlfriend takes a job in Thailand, Mischa goes along for the ride, planning only to enjoy himself as much as possible. But when he hears about the suicide of a young woman, Martiya van der Leun, in the Thai prison where she was serving a life sentence for murder, what begins as mild curiosity becomes an obsession. It is clear that Martiya was guilty, but what was it that led her to kill? 'A killer novel... A great story... You can't stop reading.' Stephen King, Entertainment Weekly

vocational training provider nyt: The New York Times Magazine , 1975

vocational training provider nyt: Teach Your Child to Read in 100 Easy Lessons Phyllis Haddox, Siegfried Engelmann, Elaine Bruner, 1986-06-15 A step-by-step program that shows parents, simply and clearly, how to teach their child to read in just 20 minutes a day.

vocational training provider nyt: College Andrew Delbanco, 2023-04-18 The strengths and failures of the American college, and why liberal education still matters As the commercialization of American higher education accelerates, more and more students are coming to college with the narrow aim of obtaining a preprofessional credential. The traditional four-year college experience—an exploratory time for students to discover their passions and test ideas and values

with the help of teachers and peers—is in danger of becoming a thing of the past. In *College*, prominent cultural critic Andrew Delbanco offers a trenchant defense of such an education, and warns that it is becoming a privilege reserved for the relatively rich. In describing what a true college education should be, he demonstrates why making it available to as many young people as possible remains central to America's democratic promise. In a brisk and vivid historical narrative, Delbanco explains how the idea of college arose in the colonial period from the Puritan idea of the gathered church, how it struggled to survive in the nineteenth century in the shadow of the new research universities, and how, in the twentieth century, it slowly opened its doors to women, minorities, and students from low-income families. He describes the unique strengths of America's colleges in our era of globalization and, while recognizing the growing centrality of science, technology, and vocational subjects in the curriculum, he mounts a vigorous defense of a broadly humanistic education for all. Acknowledging the serious financial, intellectual, and ethical challenges that all colleges face today, Delbanco considers what is at stake in the urgent effort to protect these venerable institutions for future generations.

vocational training provider nyt: A Mathematician's Lament Paul Lockhart, 2009-04-01
“One of the best critiques of current K-12 mathematics education I have ever seen, written by a first-class research mathematician who elected to devote his teaching career to K-12 education.”
—Keith Devlin, NPR's “Math Guy” A brilliant research mathematician reveals math to be a creative art form on par with painting, poetry, and sculpture, and rejects the standard anxiety-producing teaching methods used in most schools today. Witty and accessible, Paul Lockhart's controversial approach will provoke spirited debate among educators and parents alike, altering the way we think about math forever. Paul Lockhart is the author of *Arithmetic*, *Measurement*, and *A Mathematician's Lament*. He has taught mathematics at Brown University, University of California, Santa Cruz, and to K-12 level students at St. Ann's School in Brooklyn, New York.

vocational training provider nyt: The Tyranny of Merit Michael J. Sandel, 2020-09-15 A Times Literary Supplement's Book of the Year 2020 A New Statesman's Best Book of 2020 A Bloomberg's Best Book of 2020 A Guardian Best Book About Ideas of 2020 The world-renowned philosopher and author of the bestselling *Justice* explores the central question of our time: What has become of the common good? These are dangerous times for democracy. We live in an age of winners and losers, where the odds are stacked in favor of the already fortunate. Stalled social mobility and entrenched inequality give the lie to the American credo that you can make it if you try. The consequence is a brew of anger and frustration that has fueled populist protest and extreme polarization, and led to deep distrust of both government and our fellow citizens—leaving us morally unprepared to face the profound challenges of our time. World-renowned philosopher Michael J. Sandel argues that to overcome the crises that are upending our world, we must rethink the attitudes toward success and failure that have accompanied globalization and rising inequality. Sandel shows the hubris a meritocracy generates among the winners and the harsh judgement it imposes on those left behind, and traces the dire consequences across a wide swath of American life. He offers an alternative way of thinking about success—more attentive to the role of luck in human affairs, more conducive to an ethic of humility and solidarity, and more affirming of the dignity of work. *The Tyranny of Merit* points us toward a hopeful vision of a new politics of the common good.

vocational training provider nyt: Managed by the Markets Gerald F. Davis, 2009-03-26 The current economic crisis reveals just how central finance has become to American life. Problems with obscure securities created on Wall Street radiated outward to threaten the retirement security of pensioners in Florida and Arizona, the homes and college savings of families in Detroit and Southern California, and ultimately the global economy itself. The American government took on vast new debt to bail out the financial system, while the government-owned investment funds of Kuwait, Abu Dhabi, Malaysia, and China bought up much of what was left of Wall Street. How did we get into this mess, and what does it all mean? *Managed by the Markets* explains how finance replaced manufacturing at the center of the American economy and how its influence has seeped into daily life. From corporations operated to create shareholder value, to banks that became portals to

financial markets, to governments seeking to regulate or profit from footloose capital, to households with savings, pensions, and mortgages that rise and fall with the market, life in post-industrial America is tied to finance to an unprecedented degree. *Managed by the Markets* provides a guide to how we got here and unpacks the consequences of linking the well-being of society too closely to financial markets.

vocational training provider nyt: College Disrupted Ryan Craig, 2015-03-10 There is a revolution happening in higher education—and this is how it's unfolding

vocational training provider nyt: Closing of the American Mind Allan Bloom, 2008-06-30 The brilliant, controversial, bestselling critique of American culture that “hits with the approximate force and effect of electroshock therapy” (The New York Times)—now featuring a new afterword by Andrew Ferguson in a twenty-fifth anniversary edition. In 1987, eminent political philosopher Allan Bloom published *The Closing of the American Mind*, an appraisal of contemporary America that “hits with the approximate force and effect of electroshock therapy” (The New York Times) and has not only been vindicated, but has also become more urgent today. In clear, spirited prose, Bloom argues that the social and political crises of contemporary America are part of a larger intellectual crisis: the result of a dangerous narrowing of curiosity and exploration by the university elites. Now, in this twenty-fifth anniversary edition, acclaimed author and journalist Andrew Ferguson contributes a new essay that describes why Bloom’s argument caused such a furor at publication and why our culture so deeply resists its truths today.

vocational training provider nyt: OECD Reviews of Vocational Education and Training Teachers and Leaders in Vocational Education and Training OECD, 2021-03-31 Vocational education and training (VET) plays a central role in preparing young people for work, developing the skills of adults and responding to the labour-market needs of the economy. Teachers and leaders in VET can have an immediate and positive influence on learners’ skills, employability and career development.

vocational training provider nyt: Battle for the American Mind Pete Hegseth, David Goodwin, 2022-06-14 #1 NEW YORK TIMES BESTSELLER! FOX News host Pete Hegseth is back with what he says is his most important book yet: A revolutionary road map to saving our children from leftist indoctrination. Behind a smokescreen of “preparing students for the new industrial economy,” early progressives had political control in mind. America’s original schools didn’t just make kids memorize facts or learn skills; they taught them to think freely and arrive at wisdom. They assigned the classics, inspired love of God and country, and raised future citizens that changed the world forever. Today, after 16,000 hours of K-12 indoctrination, our kids come out of government schools hating America. They roll their eyes at religion and disdain our history. We spend more money on education than ever, but kids can barely read and write—let alone reason with discernment. Western culture is on the ropes. Kids are bored and aimless, flailing for purpose in a system that says racial and gender identity is everything. *Battle for the American Mind* is the untold story of the Progressive plan to neutralize the basis of our Republic – by removing the one ingredient that had sustained Western Civilization for thousands of years. Pete Hegseth and David Goodwin explain why, no matter what political skirmishes conservatives win, progressives are winning the war—and control the “supply lines” of future citizens. Reversing this reality will require parents to radically reorient their children’s education; even most homeschooling and Christian schooling are infused with progressive assumptions. We need to recover a lost philosophy of education – grounded in virtue and excellence – that can arm future generations to fight for freedom. It’s called classical Christian education. Never heard of it? You’re not alone. *Battle for the American Mind* is more than a book; it’s a field guide for remaking school in the United States. We’ve ceded our kids’ minds to the left for far too long—this book gives patriotic parents the ammunition to join an insurgency that gives America a fighting chance.

vocational training provider nyt: My Soul Is a Witness Bettye Collier-Thomas, V. P. Franklin, 2015-12-15 A powerful and inspiring record of one of the most significant periods in America's history, which presents the full historic scope of the hard-fought battle for civil rights.

From the landmark *Brown v. Board of Education* decision, in which legal segregation in public schools was declared unconstitutional, to the Nashville sit-ins organized by the Student Nonviolent Coordinating Committee, and from the Freedom Rides to the March on Washington, to the subsequent passage of the Voting Rights Act of 1965--and covering everything in between--Bettye Collier-Thomas and V. P. Franklin's *My Soul Is a Witness* is the first comprehensive chronology of the civil rights era in America. This unique chronology extends the examination of civil rights activities beyond the South to include the North, Midwest, and Far West. Although Martin Luther King, Jr. was a towering figure during the era, the authors shift the focus to the thousands of people, places, and events that encompassed the Civil Rights movement. Each entry is based on information found in articles and reports published in three newspaper and periodical sources: *The New York Times*, *Jet Magazine*, and the *Southern School News*. Supplementing the basic chronology are longer features that explore larger topics in more depth and highlight issues well-known at the time but unknown today by scholars and the general public.

vocational training provider nyt: *Journal of Developmental & Remedial Education*, 1978

vocational training provider nyt: *Class* Paul Fussell, 1992 This book describes the living-room artifacts, clothing styles, and intellectual proclivities of American classes from top to bottom.

vocational training provider nyt: *Seven Days in the Art World* Sarah Thornton, 2008-11-17 A fly-on-the-wall account of the smart and strange subcultures that make, trade, curate, collect, and hype contemporary art. The art market has been booming. Museum attendance is surging. More people than ever call themselves artists. Contemporary art has become a mass entertainment, a luxury good, a job description, and, for some, a kind of alternative religion. In a series of beautifully paced narratives, Sarah Thornton investigates the drama of a Christie's auction, the workings in Takashi Murakami's studios, the elite at the Basel Art Fair, the eccentricities of *Artforum* magazine, the competition behind an important art prize, life in a notorious art-school seminar, and the wonderland of the Venice Biennale. She reveals the new dynamics of creativity, taste, status, money, and the search for meaning in life. A judicious and juicy account of the institutions that have the power to shape art history, based on hundreds of interviews with high-profile players, Thornton's entertaining ethnography will change the way you look at contemporary culture.

vocational training provider nyt: *The Perfect Other* Kyleigh Leddy, 2022-03-15 All Kait Leddy had ever wanted was a little sister. When Kyleigh was born, they were inseparable; Kait would protect her, include her, cuddle and comfort her, and, to Kyleigh, her big sister was her whole world. As they grew, however, and as Kait entered adolescence, her personality began to change. She was lashing out emotionally and physically, and losing touch with reality in certain ways. The family struggled to keep this side of Kait private—at school and in her social life, she was still the gorgeous, effervescent life of the party with a modeling career ahead of her and big dreams. But slowly, things began to shatter, and Kyleigh could only watch in horror as her perfect sibling's world collapsed around her. Kait was institutionalized with what would eventually be diagnosed as schizophrenia, leaving Kyleigh and their mother to handle the burden, shame, and guilt alone. Then, in January 2014, Kait disappeared. Though they never found her body, security footage showed her making her way onto a big bridge over a river, where it is presumed that she jumped. Kyleigh is left wondering: What could she have done differently? How could this shining light be gone? And how will she find peace without her sister to guide her way there?

vocational training provider nyt: *Intern Nation* Ross Perlin, 2011-05-09 The first no-holds-barred expos of the exploitative and divisive world of internships.

vocational training provider nyt: *Prominent Families of New York* Lyman Horace Weeks, 1898

vocational training provider nyt: *The Heartbeat of Wounded Knee* David Treuer, 2019-01-22 FINALIST FOR THE 2019 NATIONAL BOOK AWARD LONGLISTED FOR THE 2020 ANDREW CARNEGIE MEDAL FOR EXCELLENCE A NEW YORK TIMES BESTSELLER Named a best book of 2019 by *The New York Times*, *TIME*, *The Washington Post*, NPR, Hudson Booksellers, *The*

New York Public Library, The Dallas Morning News, and Library Journal. Chapter after chapter, it's like one shattered myth after another. - NPR An informed, moving and kaleidoscopic portrait... Treuer's powerful book suggests the need for soul-searching about the meanings of American history and the stories we tell ourselves about this nation's past.. - New York Times Book Review, front page

A sweeping history—and counter-narrative—of Native American life from the Wounded Knee massacre to the present. The received idea of Native American history—as promulgated by books like Dee Brown's mega-bestselling 1970 *Bury My Heart at Wounded Knee*—has been that American Indian history essentially ended with the 1890 massacre at Wounded Knee. Not only did one hundred fifty Sioux die at the hands of the U. S. Cavalry, the sense was, but Native civilization did as well. Growing up Ojibwe on a reservation in Minnesota, training as an anthropologist, and researching Native life past and present for his nonfiction and novels, David Treuer has uncovered a different narrative. Because they did not disappear—and not despite but rather because of their intense struggles to preserve their language, their traditions, their families, and their very existence—the story of American Indians since the end of the nineteenth century to the present is one of unprecedented resourcefulness and reinvention. In *The Heartbeat of Wounded Knee*, Treuer melds history with reportage and memoir. Tracing the tribes' distinctive cultures from first contact, he explores how the depredations of each era spawned new modes of survival. The devastating seizures of land gave rise to increasingly sophisticated legal and political maneuvering that put the lie to the myth that Indians don't know or care about property. The forced assimilation of their children at government-run boarding schools incubated a unifying Native identity. Conscription in the US military and the pull of urban life brought Indians into the mainstream and modern times, even as it steered the emerging shape of self-rule and spawned a new generation of resistance. *The Heartbeat of Wounded Knee* is the essential, intimate story of a resilient people in a transformative era.

vocational training provider nyt: *True Allegiance* Ben Shapiro, 2016-11-01

vocational training provider nyt: MOOC U Jeffrey Selingo, 2014-09-02 Contributing editor to The Chronicle of Higher Education and author of *College (Un)Bound*, Jeffrey J. Selingo follows in real time the stories of all the stake-holders in University of Virginia business professor Ed Hess's popular *Grow to Greatness* MOOC to distill for MOOC students (seven million and counting) what works, what doesn't, and what to expect next of the phenomenon that is massive open online courses. When professors at top universities first began offering free online classes to the masses in 2012, the promise was that one day their experiment would revolutionize higher education forever by opening the doors to a first-class education for everyone. Since then, more than seven million students have signed up to take a massive open online course, or MOOC. But so far, MOOCs have failed to live up to the initial promises of their founders, with a vast majority of students failing to complete their courses. Lost in the rising chorus of emboldened MOOC critics are the expectations and experiences of the students who, in ever rising numbers, continue to sign up. What does a great MOOC look like, and why? Which MOOC students benefit the most? How do I get the greatest value out of taking a MOOC? To get answers, Jeffrey J. Selingo, contributing editor to The Chronicle of Higher Education and author of *College (Un)Bound*, embedded himself in University of Virginia business professor Ed Hess's *Grow to Greatness* MOOC. The result, MOOC U, is the real-time stories of the major players: students, professor, university, and MOOC provider. Written to answer the most pressing questions that MOOC students are asking, MOOC U chronicles how free online courses are changing how students learn, how professors teach, and how universities are rethinking what constitutes face-to-face education in the 21st Century.

vocational training provider nyt: From Higher Aims to Hired Hands Rakesh Khurana, 2010-03-22 Is management a profession? Should it be? Can it be? This major work of social and intellectual history reveals how such questions have driven business education and shaped American management and society for more than a century. The book is also a call for reform. Rakesh Khurana shows that university-based business schools were founded to train a professional class of managers in the mold of doctors and lawyers but have effectively retreated from that goal, leaving a gaping

moral hole at the center of business education and perhaps in management itself. Khurana begins in the late nineteenth century, when members of an emerging managerial elite, seeking social status to match the wealth and power they had accrued, began working with major universities to establish graduate business education programs paralleling those for medicine and law. Constituting business as a profession, however, required codifying the knowledge relevant for practitioners and developing enforceable standards of conduct. Khurana, drawing on a rich set of archival material from business schools, foundations, and academic associations, traces how business educators confronted these challenges with varying strategies during the Progressive era and the Depression, the postwar boom years, and recent decades of freewheeling capitalism. Today, Khurana argues, business schools have largely capitulated in the battle for professionalism and have become merely purveyors of a product, the MBA, with students treated as consumers. Professional and moral ideals that once animated and inspired business schools have been conquered by a perspective that managers are merely agents of shareholders, beholden only to the cause of share profits. According to Khurana, we should not thus be surprised at the rise of corporate malfeasance. The time has come, he concludes, to rejuvenate intellectually and morally the training of our future business leaders.

vocational training provider nyt: Excellent Sheep William Deresiewicz, 2014-08-19 A groundbreaking manifesto about what our nation's top schools should be—but aren't—providing: "The ex-Yale professor effectively skewers elite colleges, their brainy but soulless students (those 'sheep'), pushy parents, and admissions mayhem" (People). As a professor at Yale, William Deresiewicz saw something that troubled him deeply. His students, some of the nation's brightest minds, were adrift when it came to the big questions: how to think critically and creatively and how to find a sense of purpose. Now he argues that elite colleges are turning out conformists without a compass. Excellent Sheep takes a sharp look at the high-pressure conveyor belt that begins with parents and counselors who demand perfect grades and culminates in the skewed applications Deresiewicz saw firsthand as a member of Yale's admissions committee. As schools shift focus from the humanities to "practical" subjects like economics, students are losing the ability to think independently. It is essential, says Deresiewicz, that college be a time for self-discovery when students can establish their own values and measures of success in order to forge their own paths. He features quotes from real students and graduates he has corresponded with over the years, candidly exposing where the system is broken and offering clear solutions on how to fix it. "Excellent Sheep is likely to make...a lasting mark....He takes aim at just about the entirety of upper-middle-class life in America....Mr. Deresiewicz's book is packed full of what he wants more of in American life: passionate weirdness" (The New York Times).

vocational training provider nyt: Humans Need Not Apply Jerry Kaplan, 2015-08-04 An "intriguing, insightful" look at how algorithms and robots could lead to social unrest—and how to avoid it (The Economist, Books of the Year). After decades of effort, researchers are finally cracking the code on artificial intelligence. Society stands on the cusp of unprecedented change, driven by advances in robotics, machine learning, and perception powering systems that rival or exceed human capabilities. Driverless cars, robotic helpers, and intelligent agents that promote our interests have the potential to usher in a new age of affluence and leisure—but as AI expert and Silicon Valley entrepreneur Jerry Kaplan warns, the transition may be protracted and brutal unless we address the two great scourges of the modern developed world: volatile labor markets and income inequality. In Humans Need Not Apply, he proposes innovative, free-market adjustments to our economic system and social policies to avoid an extended period of social turmoil. His timely and accessible analysis of the promises and perils of AI is a must-read for business leaders and policy makers on both sides of the aisle. "A reminder that AI systems don't need red laser eyes to be dangerous."—Times Higher Education Supplement "Kaplan...sidesteps the usual arguments of techno-optimism and dystopia, preferring to go for pragmatic solutions to a shrinking pool of jobs."—Financial Times

vocational training provider nyt: Incarceration Nation Peter K. Enns, 2016-03-22

Incarceration Nation demonstrates that the US public played a critical role in the rise of mass incarceration in this country.

vocational training provider nyt: *A Time of Scandal* Rosemary Stevens, 2016-12-11 A look at what really happened in the U.S. Veterans' Bureau Scandal in the 1920s. In the early 1920s, as the nation recovered from World War I, President Warren G. Harding founded the U.S. Veterans Bureau, now known as the Department of Veterans Affairs, to treat disabled veterans. He appointed his friend, decorated veteran Colonel Charles R. Forbes, as founding director. Forbes lasted only eighteen months in the position before stepping down under a cloud of suspicion. In 1926—after being convicted of conspiracy to defraud the federal government by rigging government contracts—he was sent to Leavenworth Penitentiary. Although he was known in his day as a drunken womanizer, and as a corrupt toady of a weak president, the question persists: was Forbes a criminal or a scapegoat? Historian Rosemary Stevens tells Forbes's story anew, drawing on previously untapped records to reveal his role in America's commitment to veterans. She explores how Forbes's rise and fall in Washington illuminates Harding's efforts to bring business efficiency to government. She also examines the scandal in the context of class, professionalism, ethics, and etiquette in a rapidly changing world. Most significantly, Stevens proposes a revisionist view of both Forbes and Harding: They did not defraud the government of billions and do not deserve the reputation they have carried for a hundred years. Packed with conniving friends, FBI agents, and rival politicians as well as gamblers, revelers, and wronged wives, *A Time of Scandal* will appeal to anyone interested in political gossip, presidential politics, the "Ohio Gang," and the 1920s.

vocational training provider nyt: *The Standing of Vocational Education and the Occupations It Serves* Stephen Billett, Barbara Elisabeth Stalder, Vibe Aarkrog, Sarojni Choy, Steven Hodge, Anh Hai Le, 2022-04-21 This book addresses what is, perhaps, the single most important issue for vocational education; its relatively low standing in an era of high aspiration. The work explores the nature, extent and consequences for an educational sector that whilst having an increasingly important role in contemporary societies is seen to be of low standing across both countries with developed and developing economies. Some of the standing is associated with the occupation it serves and this is highlighted in an era of high aspiration by young people and their parents. The consequences are far-reaching. This includes how governments and community view and support vocational education, parents and familiars advise about participation in it and young people's decision-making associated with their post-school pathways. More than describing this problem, the focus of this collection is how this issue can be redressed through the actions of supra-government agencies, governments, schools in tertiary education institutions, industry and professional bodies and employers. It sets out the quality and extent of societal sentiments in shaping how vocational education and the occupation it serves are projected, across countries, continents and cultures, and offers a range of perspectives and contributions from scholars on how this issue might be redressed. These contributions are drawn together and synthesised into sets of propositions, practices and approaches directed towards governments, schooling and tertiary education institutions, educators, researchers, industry and professional bodies and employers. In this way, the book seeks to provide an authoritative, seminal, comprehensive and central text to understand and respond to this central issue for vocational education.
