**florida biology eoc results 2023:** *Mesophotic Coral Ecosystems* Yossi Loya, Kimberly A. Puglise, Tom C.L. Bridge, 2019-05-22 This book summarizes what is known about mesophotic coral ecosystems (MCEs) geographically and by major taxa. MCEs are characterized by light-dependent corals and associated communities typically found at depths ranging from 30-40 m. and extending to over 150 m. in tropical and subtropical ecosystems. They are populated with organisms typically associated with shallow coral reefs, such as macroalgae, corals, sponges, and fishes, as well as

specialist species unique to mesophotic depths. During the past decade, there has been an increasing scientific and management interest in MCEs expressed by the exponential increase in the number of publications studying this unique environment. Despite their close proximity to well-studied shallow reefs, and the growing evidence of their importance, our scientific knowledge of MCEs is still in its early stages. The topics covered in the book include: regional variation in MCEs; similarities and differences between mesophotic and shallow reef taxa, biotic and abiotic conditions, biodiversity, ecology, geomorphology, and geology; potential connectivity between MCEs and shallow reefs; MCE disturbances, conservation, and management challenges; and new technologies, key research questions/knowledge gaps, priorities, and future directions in MCE research.

**florida biology eoc results 2023: *The Fast and the Furriest*** Andy Behrens, 2010-03-09 Meet Kevin Pugh, 12-year-old couch potato. Now meet Cromwell, his part beagle, part potato chip dog. Kevin's looking forward to spending his summer doing as little as possible. Unfortunately, Kevin's father, former Chicago Bears star player/super-sports fanatic, Howie Pugh, feels differently. So does Cromwell, who has suddenly and mysteriously developed a fascination with agility competitions: running up seesaws, leaping over hurdles, soaring through hoops (sometimes). If he has to do anything, Kevin would rather do something for newly obsessed Cromwell, but dog agility lessons do not constitute a sport in his father's mind, so football camp it is. Until some well-timed events collide, literally, and soon Kevin's found a way for he and Cromwell to take classes, and the upstart Team Cromwell is born. Andy Behrens has written a hilarious novel with a dry-as-dirt protagonist who's constantly tortured by the goings-on around him. It's also a charming story about a boy and his dog, as well as a meaningful and heartfelt look at a relationship between a boy and his father who don't always see eye-to-eye.
