**island questaway constellation:** *Jungian Reflections within the Cinema* James F. Iaccino, 1998-05-26 Exploring the relevance of Jungian theory as it applies to science fiction, horror and fantasy films, this text demonstrates the remarkable correlation existing between Jung's major archetypes and recurring themes in various film genres. An introduction acquaints readers with basic Jungian theory archetypes before proceeding to film analysis. A diverse selection of movie and television summaries illustrate the relationship between a particular Jungian image and the examined films. Among the various Jungian patterns studied are the father archetype, the split between persona and shadow, the search for the grail, the alchemist traveler, and the development of the child archetype. From *Star Wars* and *Planet of the Apes* to *Back to the Future* and *Indiana Jones*, the interdependence of Jungian theory and film themes and contents unfold. Creative and innovative, this text unearths new Jungian territory that will appeal not only to psychology and film studies scholars and researchers, but also to those studying communication and literature.

**island questaway constellation:** *Reload* Mary Flanagan, Austin Booth, 2002-05-03 An anthology of feminist cyberfiction and theoretical and critical writings on gender and technoculture. Most writing on cyberculture is dominated by two almost mutually exclusive visions: the heroic image of the male outlaw hacker and the utopian myth of a gender-free cyberworld. *Reload* offers an alternative picture of cyberspace as a complex and contradictory place where there is oppression as well as liberation. It shows how cyberpunk's revolutionary claims conceal its ultimate conservatism on matters of class, gender, and race. The cyberfeminists writing here view cyberculture as a social experiment with an as-yet-unfulfilled potential to create new identities, relationships, and cultures. The book brings together women's cyberfiction—fiction that explores the relationship between people and virtual technologies—and feminist theoretical and critical investigations of gender and technoculture. From a variety of viewpoints, the writers consider the effects of rapid and profound technological change on culture, in particular both the revolutionary and reactionary effects of cyberculture on women's lives. They also explore the feminist implications of the cyborg, a human-machine hybrid. The writers challenge the conceptual and institutional rifts between high and low culture, which are embedded in the texts and artifacts of cyberculture.

The heroic quest is about saying 'yes' to yourself and in so doing, becoming more fully alive and more effective in the world. . . . The quest is replete with dangers and pitfalls, but it offers great rewards: the capacity to be successful in the world, knowledge of the mysteries of the human soul, and the opportunity to find and express your unique gifts in the world. In this bold and original work, Carol S. Pearson shows that the heroic quest isn't just for certain people under special circumstances. Exploring the many heroic paths available to each of us, at every point in our lives, her innovative program enables us to live heroically by activating and applying twelve archetypes in our lives. This companion to the bestselling *The Hero Within* outlines twelve archetypal patterns that can aid inner development and the quest for wholeness. These archetypes are inner guides that can help us prepare for the journey, by learning how to become successful members of society; embark upon the quest, by becoming initiated into the mysteries of the human soul; and return to transform our lives as a result of claiming our uniqueness and personal power. Writing for individuals seeking to realize their full potential and professionals engaged in empowering others, Pearson shows how journeys differ by the age, gender, and cultural background of the seeker, and how archetypes help awaken the capacities of our psyches. A unique diagnostic test, the Heroic Myth Index, and exercise are included to help us understand and awaken our inner guides.

**island questaway constellation:** *Queer Universes* Wendy G. Pearson, Veronica Hollinger, Joan Gordon, 2008 Contestations over the meaning and practice of sexuality have become increasingly central to cultural self-definition and critical debates over issues of identity, citizenship and the definition of humanity itself. In an era when a religious authority can declare lesbians antihuman while some nations legalise same-sex marriage and are becoming increasingly tolerant of a variety of non-normative sexualities, it is hardly surprising that science fiction, in turn, takes up the task of imagining a diverse range of queer and not-so-queer futures. The essays in *Queer Universes* investigate both contemporary and historical practices of representing sexualities and genders in science fiction literature. *Queer Universes* opens with Wendy Pearson's award-winning essay on reading sf queerly and goes on to include discussions about 'sextrapolation' in New Wave science fiction, 'stray penetration' in William Gibson's cyberpunk fiction, the queering of nature in ecofeminist science fiction, and the radical challenges posed to conventional science fiction in the work of important writers such as Samuel R. Delany, Ursula K. Le Guin, and Joanna Russ. In addition, *Queer Universes* offers an interview with Nalo Hopkinson and a conversation about queer lives and queer fictions by authors Nicola Griffith and Kelley Eskridge.

**island questaway constellation:** *Psychological Reflections on Cinematic Terror* James F. Iaccino, 1994-06-30 In this examination of the psychology of terror, Iaccino uses Jungian archetypes to analyze significant works in the horror film genre. In the past, Jungian archetypes have been used to interpret mythologies, to examine great works of literature, and to explain why sexual stereotypes persist in our society. Here, for the first time, Iaccino applies such models as the Cursed Wanderers, the Warrior Amazons, the Random Destroyers, and the Techno-Myths to highlight recurrent themes in a wide range of films, from early classics such as *Nosferatu* to the contemporary *Nightmare on Elm Street* and *Alien* series. With this innovative approach, Iaccino gains a new perspective on the psychology of the often powerful compulsion to be scared.

**island questaway constellation: Alien Constructions** Patricia Melzer, 2010-01-01 "An incisive critical work" that looks at Octavia Butler's writing, the movies of the Matrix and Alien series—and more—through a feminist lens (Femspec). Feminist thinkers and writers are increasingly recognizing science fiction's potential to shatter patriarchal and heterosexual norms, while the creators of science fiction are bringing new depth and complexity to the genre by engaging with feminist theories and politics. This book maps the intersection of feminism and science fiction through close readings of science fiction literature by Octavia E. Butler, Richard Calder, and Melissa Scott and the movies *The Matrix* and the *Alien* series. Patricia Melzer analyzes how these authors and films represent debates and concepts in three areas of feminist thought: identity and difference, feminist critiques of science and technology, and the relationship among gender identity, body, and desire, including the new gender politics of queer desires, transgender, and intersexed bodies and identities. She demonstrates that key political elements shape these debates, including global capitalism and exploitative class relations within a growing international system; the impact of computer, industrial, and medical technologies on women's lives and reproductive rights; and posthuman embodiment as expressed through biotechnologies, the body/machine interface, and the commodification of desire. Melzer's investigation makes it clear that feminist writings and readings of science fiction are part of a feminist critique of existing power relations—and that the alien constructions (cyborgs, clones, androids, aliens, and hybrids) that populate postmodern science fiction are as potentially empowering as they are threatening.

**island questaway constellation: The Subject of Race in American Science Fiction** Sharon DeGraw, 2006-12-19 While the connections between science fiction and race have largely been

neglected by scholars, racial identity is a key element of the subjectivity constructed in American SF. In his Mars series, Edgar Rice Burroughs primarily supported essentialist constructions of racial identity, but also included a few elements of racial egalitarianism. Writing in the 1930s, George S. Schuyler revised Burroughs' normative SF triangle of white author, white audience, and white protagonist and promoted an individualistic, highly variable concept of race instead. While both Burroughs and Schuyler wrote SF focusing on racial identity, the largely separate genres of science fiction and African American literature prevented the similarities between the two authors from being adequately acknowledged and explored. Beginning in the 1960s, Samuel R. Delany more fully joined SF and African American literature. Delany expands on Schuyler's racial constructionist approach to identity, including gender and sexuality in addition to race. Critically intertwining the genres of SF and African American literature allows a critique of the racism in the science fiction and a more accurate and positive portrayal of the scientific connections in the African American literature. Connecting the popular fiction of Burroughs, the controversial career of Schuyler, and the postmodern texts of Delany illuminates a gradual change from a stable, essentialist construction of racial identity at the turn of the century to the variable, social construction of poststructuralist subjectivity today.

**island questaway constellation: Living in Utopia** Lucy Sargisson, Lyman Tower Sargent, 2017-03-02 Utopia is, literally, the good place that is no place. Utopias reveal people's dreams and desires and they may gesture towards different and better ways of being. But they are rarely considered as physical, observable phenomena. In this book Sargisson and Sargent, both established writers on utopian theory, turn their attention to real-life utopian communities. The book is based on their fieldwork and extensive archival research in New Zealand, a country with a special place in the history of utopianism. A land of opportunity for settlers with dreams of a better life, New Zealand has, per capita, more intentional communities - groups of people who have chosen to live and sometimes work together for a common purpose - than any country in the world. Sargisson and Sargent draw on the experiences of more than fifty such communities, to offer the first academic survey of this form of living utopian experiment. In telling the story of the New Zealand experience, *Living in Utopia* provides both transferable lessons in community, cooperation and social change and a unique insight into the utopianism at the heart of politics, society, and everyday life.

**island questaway constellation: Race in American Science Fiction** Isiah Lavender, 2011-02-08 Noting that science fiction is characterized by an investment in the proliferation of racial difference, Isiah Lavender III argues that racial alterity is fundamental to the genre's narrative strategy. *Race in American Science Fiction* offers a systematic classification of ways that race appears and how it is silenced in science fiction, while developing a critical vocabulary designed to focus attention on often-overlooked racial implications. These focused readings of science fiction contextualize race within the genre's better-known master narratives and agendas. Authors discussed include Isaac Asimov, Ray Bradbury, Philip K. Dick, and Ursula K. Le Guin, among many others.

**island questaway constellation: Black Space** Adilifu Nama, 2010-01-01 Winner, Rollins Book Award, Southwest Texas Popular Culture Association/American Culture Association, 2008 Science fiction film offers its viewers many pleasures, not least of which is the possibility of imagining other worlds in which very different forms of society exist. Not surprisingly, however, these alternative worlds often become spaces in which filmmakers and film audiences can explore issues of concern in our own society. Through an analysis of over thirty canonic science fiction (SF) films, including *Logan's Run*, *Star Wars*, *Blade Runner*, *Back to the Future*, *Gattaca*, and *Minority Report*, *Black*

Space offers a thorough-going investigation of how SF film since the 1950s has dealt with the issue of race and specifically with the representation of blackness. Setting his study against the backdrop of America's ongoing racial struggles and complex socioeconomic histories, Adilifu Nama pursues a number of themes in *Black Space*. They include the structured absence/token presence of blacks in SF film; racial contamination and racial paranoia; the traumatized black body as the ultimate signifier of difference, alienness, and otherness; the use of class and economic issues to subsume race as an issue; the racially subversive pleasures and allegories encoded in some mainstream SF films; and the ways in which independent and extra-filmic productions are subverting the SF genre of Hollywood filmmaking. The first book-length study of African American representation in science fiction film, *Black Space* demonstrates that SF cinema has become an important field of racial analysis, a site where definitions of race can be contested and post-civil rights race relations (re)imagined.

Thirty years ago, threatened by an invading fleet from the Dai Viet Empire, the Citadel disappeared and was never seen again. But now the empire itself is under siege, on the verge of a war against an enemy that turns their own mindships against them; and the Empress, who once gave the order to raze the Citadel, is in desperate need of its weapons. Meanwhile, on a small isolated space station, an engineer obsessed with the past works on a machine that will send her thirty years back, to the height of the Citadel's power. But the Citadel's disappearance still extends chains of grief and regret all the way into the fraught atmosphere of the Imperial Court; and this casual summoning of the past might have world-shattering consequences . . . A new book set in the award-winning, critically acclaimed Xuya universe. Praise for Aliette de Bodard "Startlingly original." —The Guardian "A writer who deserves attention." —SF Signal

**island questaway constellation: Fantasy Girls** Elyce Rae Helford, 2000 A new collection on women in American television in the 90s uncovers a cultural obsession with tough yet sexy heroines in mythical pasts, the girl power present, and utopic futures. Xena, Buffy, Sabrina, and a host of other characters have become household words, as well as icons of pop culture 'feminism.' Their popularity makes for successful programming, however, how much does this trend truly represent a contemporary feminist breakthrough? And what does it mean for feminism in the next few decades? *Fantasy Girls: Navigating the New Universe of Science Fiction and Fantasy Television* seeks to explore as well as challenge the power and the promises of this recent media phenomenon. Such TV programming offers the exciting opportunity to rethink established gender norms, but how far is it really pushing the limits of the status quo? Amidst the exuberant optimism of fanzines and doting fan websites, the contributors to this volume endeavor to provide us with a much needed critical analysis of this contemporary trend. These essays explore the contradictions and limitations inherent

in the genre, forcing readers to take a fresh and critical look through a variety of lenses including girl power, postfeminism, cyborg feminism, disability politics, queer studies, and much more. Programs covered are Babylon 5, Buffy the Vampire Slayer, Disney's Cinderella, Lois and Clark, Mystery Science Theater 3000, Sabrina the Teenage Witch, Star Trek: Voyager, The X-Files, Third Rock from the Sun, and Xena: Warrior Princess.

**island questaway constellation:** *Astrofuturism* De Witt Douglas Kilgore, 2010-08-03 *Astrofuturism: Science, Race, and Visions of Utopia in Space* is the first full-scale analysis of an aesthetic, scientific, and political movement that sought the amelioration of racial difference and social antagonisms through the conquest of space. Drawing on the popular science writing and science fiction of an eclectic group of scientists, engineers, and popular writers, De Witt Douglas Kilgore investigates how the American tradition of technological utopianism responded to the political upheavals of the twentieth century. Founded in the imperial politics and utopian schemes of the nineteenth century, astrofuturism envisions outer space as an endless frontier that offers solutions to the economic and political problems that dominate the modern world. Its advocates use the conventions of technological and scientific conquest to consolidate or challenge the racial and gender hierarchies codified in narratives of exploration. Because the icon of space carries both the imperatives of an imperial past and the democratic hopes of its erstwhile subjects, its study exposes the ideals and contradictions endemic to American culture. Kilgore argues that in the decades following the Second World War the subject of race became the most potent signifier of political crisis for the predominantly white and male ranks of astrofuturism. In response to criticism inspired by the civil rights movement and the new left, astrofuturists imagined space frontiers that could extend the reach of the human species and heal its historical wounds. Their work both replicated dominant social presuppositions and supplied the resources necessary for the critical utopian projects that emerged from the antiracist, socialist, and feminist movements of the twentieth century. This survey of diverse bodies of literature conveys the dramatic and creative syntheses that astrofuturism envisions between people and machines, social imperatives and political hope, physical knowledge and technological power. Bringing American studies, utopian literature, popular conceptions of race and gender, and the cultural study of science and technology into dialogue, *Astrofuturism* will provide scholars of American culture, fans of science fiction, and readers of science writing with fresh perspectives on both canonical and cutting-edge astrofuturist visions.

**island questaway constellation: Where Are the Constellations?** Stephanie Sabol, Who HQ, 2021-07-06 Calling all stargazers, this addition to the New York Times bestselling series is sure to be the perfect book for you! From the #1 New York Times Best-Selling Who Was? series comes *Where Is?*, a series that tells the stories of world-famous landmarks and natural wonders and features a fold-out map! Ancient people from many different cultures--Greek, Roman, Mezo-American, Arab--all looked up and imagined pictures in the sky by drawing a line from one star to another, like a connect-the-dots puzzle. These star pictures--constellations--represented myths and legends from the various cultures that still fascinate us today. Author of the tremendously popular *Where Is Our Solar System?* Stephanie Sabol relates many of the most popular constellation stories and explains what stars actually are: how they formed, why they die, and how they're grouped into constellation families.

**island questaway constellation: Gender, Race, and American Science Fiction** Jason Haslam, 2015-05-08 This book focuses on the interplay of gender, race, and their representation in

American science fiction, from the nineteenth-century through to the twenty-first, and across a number of forms including literature and film. Haslam explores the reasons why SF provides such a rich medium for both the preservation of and challenges to dominant mythologies of gender and race. Defining SF linguistically and culturally, the study argues that this mode is not only able to illuminate the cultural and social histories of gender and race, but so too can it intervene in those histories, and highlight the ruptures present within them. The volume moves between material history and the linguistic nature of SF fantasies, from the specifics of race and gender at different points in American history to larger analyses of the socio-cultural functions of such identity categories. SF has already become central to discussions of humanity in the global capitalist age, and is increasingly the focus of feminist and critical race studies; in combining these earlier approaches, this book goes further, to demonstrate why SF must become central to our discussions of identity writ large, of the possibilities and failings of the human —past, present, and future. Focusing on the interplay of whiteness and its various 'others' in relation to competing gender constructs, chapters analyze works by Nathaniel Hawthorne, Mary E. Bradley Lane, Edgar Rice Burroughs, Philip Francis Nowlan, George S. Schuyler and the Wachowskis, Frank Herbert, William Gibson, and Octavia Butler. Academics and students interested in the study of Science Fiction, American literature and culture, and Whiteness Studies, as well as those engaged in critical gender and race studies, will find this volume invaluable.

**island questaway constellation: Silent Interviews** Samuel R. Delany, 2018-08-14 Collected interviews featuring the Nebula Award-winning author and his thoughts on topics like literary criticism, comic books, race, and sexuality. For nearly three decades, Samuel R. Delany's science fiction has transported millions of readers to the fringes of time, technology, and outer space. Now Delany surveys the realms of his own experience as a writer, critic, theorist, and gay Black man in this collection of written interviews, a type of guided essay. Because the written interview avoids the "mutual presence positioned at the semantic core" of traditional interview, Delany explains, "a kind of cut remains between the participants—a fissure in which the truths there may be more malleable, less rigid." Within that fissure Delany pursues the breadth and depth of his ideas on language and theory, the politics of literary composition, the experience of marginality, and the philosophical, commercial, and personal contexts of writing today. Gathered from sources as diverse as *Diacritics* and *The Comics Journal*, these interviews reveal the broad range of Delany's thought and interests. "Delany has a unique place in late twentieth century letters. A lifelong inhabitant of the margins, both social and literary, he has used his marginalized status as a lens to focus his astute observations of American literature and society. From these interviews his voice emerges, provocative, precise, and engaging." —Kathleen Spencer, University of Nebraska "Samuel R. Delany never shies away from contestable positions or provocative opinions. In his fiction, Delany can write like quicksilver, and in lectures or panel discussions, he is easily SF's most articulate spokesperson in academia. . . . There is much here that is not covered in Delany's critical or autobiographical writings, and much that anyone seriously interested in SF—or many of Delany's other favorite topics—ought to consider." —Locus "Delany is fascinating whether discussing SF, comics, or his experiences as a Black American, and this collection . . . is as entertaining as it is informative." —Science Fiction Chronicle "Yevgeny Zamyatin? Stanislaw Lem? Forget it! Delany is both, with a lot of Borges and Bruno Schultz thrown in." —Village Voice

**island questaway constellation:** *Queer Experimental Literature* Tyler Bradway, 2017-05-09

This volume argues that postwar writers queer the affective relations of reading through experiments with literary form. Tyler Bradway conceptualizes “bad reading” as an affective politics that stimulates queer relations of erotic and political belonging in the event of reading. These incipiently social relations press back against legal, economic, and discursive forces that reduce queerness into a mode of individuality. Each chapter traces the affective politics of bad reading against moments when queer relationality is prohibited, obstructed, or destroyed—from the pre-Stonewall literary obscenity debates, through the AIDS crisis, to the emergence of neoliberal homonormativity and the gentrification of the queer avant-garde. Bradway contests the common narrative that experimental writing is too formalist to engender a mode of social imagination. Instead, he illuminates how queer experimental literature uses form to redraw the affective and social relations that structure the heteronormative public sphere. Through close readings informed by affect theory, *Queer Experimental Literature* offers new perspectives on writers such as William S. Burroughs, Samuel R. Delany, Kathy Acker, Jeanette Winterson, Eve Kosofsky Sedgwick, Alison Bechdel, and Chuck Palahniuk. *Queer Experimental Literature* ultimately reveals that the recent turn to affective reading in literary studies is underwritten by a para-academic history of bad reading that offers new idioms for understanding the affective agencies of queer aesthetics.

**island questaway constellation: *Women in Utopia*** Carol A. Kolmerten, 1998-09 This study contributes to the understanding of Owenism and why it failed. It corrects many of the earlier misconceptions and errors of fact about New Harmony, Indiana, and the seven other Owenite communities founded in 1826 and 1827.
