roger thorpe guiding light: A Patriot's History of the United States Larry Schweikart, Michael Patrick Allen, 2004-12-29 For the past three decades, many history professors have allowed their biases to distort the way America's past is taught. These intellectuals have searched for instances of racism, sexism, and bigotry in our history while downplaying the greatness of America's patriots and the achievements of "dead white men." As a result, more emphasis is placed on Harriet Tubman than on George Washington; more about the internment of Japanese Americans during World War II than about D-Day or Iwo Jima; more on the dangers we faced from Joseph McCarthy than those we faced from Josef Stalin. *A Patriot's History of the United States* corrects those doctrinaire biases. In this groundbreaking book, America's discovery, founding, and development are reexamined with an appreciation for the elements of public virtue, personal liberty, and private property that make this nation uniquely successful. This book offers a long-overdue acknowledgment of America's true and proud history.

Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. *Families Caring for an Aging America* examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.

roger thorpe guiding light: Laser Radar National Research Council, Division on Engineering and Physical Sciences, Committee on Review of Advancements in Active Electro-Optical Systems to Avoid Technological Surprise Adverse to U.S. National Security, 2014-03-14 In today's world, the range of technologies with the potential to threaten the security of U.S. military forces is extremely broad. These include developments in explosive materials, sensors, control systems, robotics, satellite systems, and computing power, to name just a few. Such technologies have not only enhanced the capabilities of U.S. military forces, but also offer enhanced offensive capabilities to potential adversaries - either directly through the development of more sophisticated weapons, or more indirectly through opportunities for interrupting the function of defensive U.S. military systems. Passive and active electro-optical (EO) sensing technologies are prime examples. Laser Radar considers the potential of active EO technologies to create surprise; i.e., systems that use a source of visible or infrared light to interrogate a target in combination with sensitive detectors and processors to analyze the returned light. The addition of an interrogating light source to the system adds rich new phenomenologies that enable new capabilities to be explored. This report evaluates the fundamental, physical limits to active EO sensor technologies with potential military utility; identifies key technologies that may help overcome the impediments within a 5-10 year timeframe; considers the pros and cons of implementing each existing or emerging technology; and evaluates the potential uses of active EO sensing technologies, including 3D mapping and multi-discriminate laser radar technologies.

Kim Zimmer, Laura Morton, 2011-08-02 As the notorious Reva Shayne on the daytime television drama *Guiding Light*, Kim Zimmer portrayed a vixen, a manic-depressive, an Amish woman, a time traveler, a Civil War belle, a talk show host, a cancer survivor, a loving mother, and a devoted wife. In her more than two decades on the show, she earned eleven Daytime Emmy nominations and four wins, not to mention a legion of loving fans. Now, in this heartfelt memoir, Zimmer delves into her experiences as a daytime diva. Packed with on- and off-set photographs and behind-the-scenes information, blatantly honest and wildly indiscreet, *I'm Just Sayin'* tells all in an insightful journey through the parallel lives of Reva Shayne and Kim Zimmer—and the true stories behind the longest-running drama in television and radio history.

roger thorpe guiding light: Cochrane Handbook for Systematic Reviews of Interventions Julian P. T. Higgins, Sally Green, 2008-11-24 Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in *The Cochrane Library* (www.thecochranelibrary.com). *The Cochrane Handbook for Systematic Reviews of Interventions* contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

roger thorpe guiding light: Undrafted Nick Kypreos, 2020-10-20 True stories and hard-won lessons about a life of hockey, from a Stanley Cup champion and top analyst. As a child growing up in Toronto, Nick Kypreos lived for hockey and dreamed of following in his idols' footsteps to play in the NHL. Hockey was an important part of the Kypreos household. It was largely through the game that his immigrant Greek parents acclimatized to their new lives in Canada, and from a young age "Kyper" proved he was more than good enough to move through the ranks. But he was never a top prospect—he didn't even attend the NHL draft when he became eligible. And yet, through dedication and constant improvement, he made it to the show. Kypreos built a career on his tireless work ethic and made a name for himself for always having a positive influence on team morale. A medium-weight fighter, he squared off with the league's toughest players, including Chris Simon, Joey Kocur, Tony Twist, and Scott Stevens—anything to give his team an edge. Ultimately, he was brought to the New York Rangers to help them win the Stanley Cup in 1994—their first in fifty-four years—with the legendary Mark Messier. And then he got to live his other dream: playing for his hometown team, the Toronto Maple Leafs. When a concussion forced him to retire early, it changed his life. But the lessons he'd learned on the ice over eight seasons helped him build a new career as

a top hockey analyst and personality for Sportsnet. For twenty seasons he provided unique insight on the evolving game, and a player's perspective on the biggest discussions of the day. Revealing, fun, and brutally honest, *Undrafted* shows the challenges of being a pro player. It's a story of the resilience it takes to prove yourself every night, and how the right attitude can lead to the greatest success, not only in the arena, but in life.

In these brief lyric poems, guilt, blame, terror, and sorrow weave their way through 'a fine cloudless day' to the 'crowded church' where a mother makes a fist against God, against the gods, while the speaker, not yet born, claims 'No one saw her do this, I saw her do this.' Such contradictions, capturing our impossible human condition, flood these beautifully unsettling poems. Yeats's apprehension--'for the world's more full of weeping than you can understand'--haunts and accompanies this gorgeous first book.--Catherine Barnett Maeve Kinkead's poems tell secrets, skin griefs, and make contact with the dead. Geier, 2017-02-10 The book includes six chapters that cover Virginia history from initial settlement through the 20th century plus one that deals with the important role of underwater archaeology. Changes in research strategy over time are discussed, and recommendations are made concerning the need to recognize the diverse and often differing roles and impacts that characterized the different regions of Virginia over the course of its historic past. Significant issues in Virginia history needing greater study are identified.

roger thorpe guiding light: *Contingencies of Reinforcement* B. F. Skinner, 2014-07-01 B. F. Skinner titled this book, *Contingencies of Reinforcement*, after the heart of his science of behavior. Contingencies relate classes of actions to postcedent events and to the contexts in which those action-postcedent relations occur. The basic processes seem straightforward, but many people do not know or understand the underlying theory. Skinner believed that 'a theory is essential to the scientific understanding of behavior as a subject matter'. This book presents some of Skinner's most sophisticated statements about theoretical issues. To his original articles, he added notes to clarify and expand subtle points. The book thus provides an overview of Skinner's thinking about theory and the philosophy underpinning the science he began.

NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon *Sapiens*, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and

war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? Homo Deus explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is Homo Deus. With the same insight and clarity that made Sapiens an international hit and a New York Times bestseller, Harari maps out our future.

roger thorpe guiding light: *Broken Idols of the English Reformation* Margaret Aston, 2015-11-26 Why were so many religious images and objects broken and damaged in the course of the Reformation? Margaret Aston's magisterial new book charts the conflicting imperatives of destruction and rebuilding throughout the English Reformation from the desecration of images, rails and screens to bells, organs and stained glass windows. She explores the motivations of those who smashed images of the crucifixion in stained glass windows and who pulled down crosses and defaced symbols of the Trinity. She shows that destruction was part of a methodology of religious revolution designed to change people as well as places and to forge in the long term new generations of new believers. Beyond blanked walls and whited windows were beliefs and minds impregnated by new modes of religious learning. Idol-breaking with its emphasis on the treacheries of images fundamentally transformed not only Anglican ways of worship but also of seeing, hearing and remembering.

In *Tricks*, Domenico Starnone presents an unusual duel between two formidable minds. One is Daniele Mallarico, a once-successful illustrator who feels his artistic prowess fading. The other is Mario, Daniele's four-year-old grandson. Daniele is living in virtual solitude in Milan when his daughter asks him to come to Naples to babysit Mario for a few days. Shut inside his childhood home—an apartment in the center of Naples that is filled with memories of Daniele's past—grandfather and grandson match wits as Daniele heads toward a reckoning with his own ambitions and life choices. Meanwhile, Naples pulses outside, a wily, passionate city whose influence can never be shaken. As translator Jhumpa Lahiri says in her introduction, *Trick* is “an extremely playful literary composition” by the Strega Prize-winning novelist whom many consider to

be one of Italy's greatest living writers.

roger thorpe guiding light: *The Shadow and Its Shadow* Paul Hammond, 2000-11 *The Shadow and Its Shadow* is a classic collection of writings by the Surrealists on their mad love of moviegoing. The forty-odd theoretical, polemical, and poetical re-visions of the seventh art in this anthology document Surrealism's scandalous and nonreductive take on film. Writing between 1918 and 1977, the essayists include such names as André Breton, Louis Aragon, Robert Desnos, Salvador Dalí, Luis Buñuel, and man Ray, as well as many of the less famous though equally fascinating figures of the movement. Paul Hammond's introduction limns the history of Surrealist cinemania, highlighting how these revolutionary poets, artists, and philosophers sifted the silt of commercial-often Hollywood-cinema for the odd fleck of gold, the windfall movie that, somehow slipping past the censor, questioned the dominant order. Such prospecting pivoted around the notion of lyrical behavior-as depicted on the screen and as lived in the movie house. The representation of such behavior led the Surrealists to valorize the manifest content of such denigrated genres as silent and sound comedy, romantic melodrama, film noir, horror movies. As to lived experience, moviegoing Surrealists looked to the spectacle's latent meaning, reading films as the unwitting providers of redemptive sequences that could be mentally clipped out of their narrative context and inserted into daily life-there, to provoke new adventures. Hammond's book is a reminder of the wealth and range of surrealist writings on the cinema. . . . [T]he work represented here is still challenging and genuinely eccentric, locating itself in an 'ethic' of love, reverie and revolt. --Sight & Sound Hammond, who is the author of the invaluable anthology *The Shadow and its Shadow: Surrealist Writing on the Cinema* (1978), writes about cinema independently of the changing academic and cultural fashions of film theory and abhors the dogmas of contemporary border-patrol thought. His magnetically appealing free-wheeling form of erudite film-critical writing is recognisable for its iconoclastic humour, non-authoritarian verve and playful witty discursivity. --John Conomos, *Senses of Cinema* Paul Hammond is a writer, editor, and translator living in Barcelona. He is the author of *Constellations of Miró*, Breton which was published by City Lights.
