Setting Up ASU: A Comprehensive Guide for Students and Faculty

Are you ready to dive into the world of Arizona State University (ASU)? Whether you're a newly admitted student navigating the enrollment process or a faculty member preparing for a new semester, getting set up with ASU's systems and resources can feel overwhelming. This comprehensive guide breaks down the essential steps involved in setting up your ASU experience, providing clear, actionable advice to streamline the process and ensure a smooth start. We'll cover everything from accessing student portals to understanding campus resources, helping you confidently navigate the ASU landscape.

Setting Up Your ASU Student Account: A Step-by-Step Guide

For incoming students, the first hurdle is often setting up your official ASU student account. This is your gateway to accessing crucial information and services.

Accessing Your ASU Email: This is usually the first thing you'll need. Your ASU email address is your primary communication channel with the university. Check your admission materials for instructions

on how to access and activate your account. Often, you'll need your student ID number (provided in your acceptance letter) and a password you create.

SunDevil Central: Familiarize yourself with SunDevil Central, ASU's student portal. This online hub is your one-stop shop for everything from course registration and financial aid information to academic advising and important announcements. Learn to navigate its various sections; it will become your indispensable tool throughout your academic journey.

My ASU Mobile App: Download the My ASU mobile app for convenient access to your schedule, grades, and important notifications on the go. This app is a lifesaver for staying organized and up-to-date.

Setting Up Two-Factor Authentication (2FA): For enhanced security, ASU strongly encourages setting up 2FA for your student account. This adds an extra layer of protection, making it more difficult for unauthorized individuals to access your personal information. Learn how to enable this feature within your SunDevil Central account.

Navigating ASU's Campus Resources: From Libraries to Student Services

Once your account is set up, explore ASU's extensive resources. These resources are designed to support your academic success and overall well-being.

Libraries and Research Databases: ASU boasts a remarkable library system, with multiple locations across its campuses. Familiarize yourself with the online catalog and research databases to access scholarly articles, books, and other essential resources for your studies.

Academic Advising: Schedule an appointment with your academic advisor to discuss your academic plan, course selection, and any questions you might have about your degree program. Your advisor is a valuable resource for navigating your academic path.

Student Health Services: Take advantage of ASU's health services, which provide a range of medical care options to students. Knowing where to access these services can be crucial in case of illness or injury.

Student Support Services: ASU offers a wide array of support services, including counseling, disability services, and career services. Explore these resources and don't hesitate to utilize them if you need assistance.

IT Support: If you experience any technical difficulties with your ASU account or university systems, contact ASU's IT support department for assistance. They provide timely and effective help.

Setting up ASU for Faculty Members: A Different Perspective

For faculty members, setting up at ASU involves a different set of tasks, primarily focused on accessing teaching resources and administrative tools.

ASU Faculty Portal: Similar to SunDevil Central for students, faculty have access to a dedicated portal with tools for course management, grading, and communication with students.

Course Management Systems: Familiarize yourself with the course management system (often Canvas) used by ASU. This platform allows you to upload course materials, assign assignments, and communicate with your students.

Research Resources: If you're conducting research, explore ASU's research support services and databases, which offer resources for grant applications, data analysis, and scholarly publication.

Tips for a Smooth ASU Setup

Read emails carefully: ASU sends important information via email. Make sure you regularly check your inbox.

Utilize online tutorials: ASU provides helpful online tutorials and guides to help you navigate various systems.

Don't hesitate to ask for help: If you're stuck, reach out to ASU support services. They're there to assist you.

Stay organized: Keep track of important deadlines, assignments, and appointments using a calendar or planner.

Conclusion

Setting up at ASU involves several steps, but with careful planning and utilization of available resources, the process can be streamlined and efficient. By understanding the key systems and services offered by the university, students and faculty can focus on their primary goals—learning and teaching—while confidently navigating the ASU environment. setting up asu: Designing the New American University Michael M. Crow, William B. Dabars, 2015-03-15 A radical blueprint for reinventing American higher education. America's research universities consistently dominate global rankings but may be entrenched in a model that no longer accomplishes their purposes. With their multiple roles of discovery, teaching, and public service, these institutions represent the gold standard in American higher education, but their evolution since the nineteenth century has been only incremental. The need for a new and complementary model that offers broader accessibility to an academic platform underpinned by knowledge production is critical to our well-being and economic competitiveness. Michael M. Crow, president of Arizona State University and an outspoken advocate for reinventing the public research university, conceived the New American University model when he moved from Columbia University to Arizona State in 2002. Following a comprehensive reconceptualization spanning more than a decade, ASU has emerged as an international academic and research powerhouse that serves as the foundational prototype for the new model. Crow has led the transformation of ASU into an egalitarian institution committed to academic excellence, inclusiveness to a broad demographic, and maximum societal impact. In *Designing the New American University*, Crow and coauthor William B. Dabars—a historian whose research focus is the American research university—examine the emergence of this set of institutions and the imperative for the new model, the tenets of which may be adapted by colleges and universities, both public and private. Through institutional innovation, say Crow and Dabars, universities are apt to realize unique and differentiated identities, which maximize their potential to generate the ideas, products, and processes that impact quality of life, standard of living, and national economic competitiveness. *Designing the New American University* will ignite a national discussion about the future evolution of the American research university.

Indeed the breadth of Nozick's work is perhaps greater than that of any other contemporary philosopher. This book is the first to give full and proper discussion of Nozick's philosophy as a whole, including his influential work on the theory of knowledge, his notion of 'tracking the truth', his metaphysical writings on personal identity and free will, his evolutionary account of rationality, his varying treatments of Newcomb's paradox and his ideas on the meaning of life. Illuminating and informative, the book will be welcomed as an authoritative guide to Nozick's philosophical thinking.

setting up asu: COMPUGIRLS Kimberly A. Scott, 2021-10-19 What does it mean for girls of color to become techno-social change agents--individuals who fuse technological savvy with a deep understanding of society in order to analyze and confront inequality? Kimberly A. Scott explores this question and others as she details the National Science Foundation-funded enrichment project COMPUGIRLS. This groundbreaking initiative teaches tech skills to adolescent girls of color but, as importantly, offers a setting that emphasizes empowerment, community advancement, and self-discovery. Scott draws on her experience as an architect of COMPUGIRLS to detail the difficulties of translating participants' lives into a digital context while tracing how the program evolved. The dramatic stories of the participants show them blending newly developed technical and communication skills in ways designed to spark effective action and bring about important change. A compelling merger of theory and storytelling, COMPUGIRLS provides a much-needed roadmap for understanding how girls of color can find and define their selves in today's digital age.

And as a result of this data explosion, current data management methods can become inadequate. People are using the term big data (sometimes referred to as Big Data) to describe this latest industry trend. IBM® is preparing the next generation of technology to meet these data management challenges. To provide the capability of incorporating big data sources and analytics of these sources, IBM developed a stream-computing product that is based on the open source computing framework Apache Hadoop. Each product in the framework provides unique capabilities to the data management environment, and further enhances the value of your data warehouse investment. In this IBM Redbooks® publication, we describe the need for big data in an organization. We then introduce IBM InfoSphere® BigInsights™ and explain how it differs from standard Hadoop. BigInsights provides a packaged Hadoop distribution, a greatly simplified installation of Hadoop and corresponding open source tools for application development, data movement, and cluster management. BigInsights also brings more options for data security, and as a component of the IBM big data platform, it provides potential integration points with the other components of the platform. A new chapter has been added to this edition. Chapter 11 describes IBM Platform Symphony®, which is a new scheduling product that works with IBM Insights, bringing low-latency scheduling and multi-tenancy to IBM InfoSphere BigInsights. The

book is designed for clients, consultants, and other technical professionals.

setting up asu: Every Week a Season Brian Curtis, 2007-12-18 "Brian Curtis tells the stories behind the stories. He brings the meetings, practice sessions, recruiting calls and game day experience to light like never before. Fans who want to know what goes on behind the scenes will find out in this book." -RON ZOOK, head football coach, the University of Florida In Every Week a Season, acclaimed sports reporter and author Brian Curtis takes readers on an unprecedented whirlwind tour of NCAA Division I football. It's a world that breeds great drama, a world that millions watch but few understand. It is a multibillion-dollar business. It is an obsession. To get to the beating heart of college football, Curtis embarked on a breakneck itinerary that took him where all red-blooded college football fans long to be: behind the scenes at nine big-time programs. In nine weeks, Curtis visited Colorado State University, the University of Georgia, Boston College, the University of Tennessee, the University of Maryland, the University of Wisconsin, Louisiana State University, Florida State University, and Arizona State University. He braved the rain to watch

Wisconsin pull off the upset of the year; he was at Neyland Stadium to see Tennessee manage a thrilling overtime victory; he was in Tallahassee to witness Florida State's dramatic double overtime battle for the ACC title. As added bonuses, he was with Georgia when the team fought for the SEC Championship, and on the LSU sideline when the boys from Baton Rouge defeated Oklahoma to capture the BCS National Championship. At each stop, he brings us inside the game's inner sanctum: in team meetings and scouting sessions; on the field and on the sidelines, during scrimmages, practices, and games; at pre-game traditions, meals, and religious services; in the locker room before the game and at half-time. Virtually nothing and no one was off-limits. Along with the players, Curtis got to know the coaches—from the young guns to the legends—spending time with them in their offices and on the road. We see firsthand the challenges of running a major college football program—when called on, coaches must serve as CEOs, PR gurus, lawyers, politicians, and policemen. We also learn of the sacrifices made by wives and children that enable coaches to keep the numerous young athletes under their supervision focused, secure, and happy. Brian Curtis gives a no-holds-barred insider's account that will rank as one of the most honest and accurate books on big-time sports in America. Short of strapping on a helmet, you'll never get closer to the game.
