This overview ranges from the sublime paintings of a resourceful ranching woman to the polished work of artists trained in Paris, Rome, and New York. It highlights the rural and the cosmopolitan, the traditional and the modern, the concrete and the transcendent that encompass

Utah art. This sweeping exhibition showcases 300 works of art by 220 artists painstakingly compiled from a list of 10,000 Utah artists. One hundred twenty of the artworks are reproduced in rich color, most illustrated for the first time. Selected works and biographical material on the artists are presented chronologically, providing a perspective on Utah art that will make this volume an essential reference for collectors, scholars, and enthusiasts of Utah art. transcendent time utah: *American Eloquence* Roderick P. Hart, 2023-01-24 What makes political speech powerful? How does eloquent rhetoric transcend ordinary language? Which stylistic choices allow effective orators to stir emotions and spur action? And in the age of Donald Trump, does political eloquence still matter? This book examines a wide swath of political discourse to shed new light on the meaning and significance of eloquence. Roderick P. Hart, a leading scholar of political communication, develops new ways of measuring persuasiveness and rhetorical power through the use of computer-based methods. He examines one hundred of the most important speeches of the twentieth century, given by presidents and politicians as well as leaders, activists, and cultural figures including Martin Luther King Jr., Lou Gehrig, Mario Savio, Carrie Chapman Catt, and Stokely Carmichael. Deploying the tools of the digital humanities as well as critical rhetorical analysis, Hart considers what distinguishes the linguistic properties of iconic oratory from those of more mundane texts. He argues that eloquence represents the confluence of cultural resonance, personal investment, and poetic imagination, providing empirical metrics for assessing each of these qualities. A quantitative and qualitative exploration of American political speech, this interdisciplinary book offers a powerful argument for why eloquence is essential for a functioning democracy.

In this gripping investigation, award-winning journalist Michael Easter seeks out off-the-grid visionaries, disruptive genius researchers, and mind-body conditioning trailblazers who are unlocking the life-enhancing secrets of a counterintuitive solution: discomfort. Easter's journey to understand our evolutionary need to be challenged takes him to meet the NBA's top exercise scientist, who uses an ancient Japanese practice to build championship athletes; to the mystical country of Bhutan, where an Oxford economist and Buddhist leader are showing the world what death can teach us about happiness; to the outdoor lab of a young neuroscientist who's found that nature tests our physical and mental endurance in ways that expand creativity while taming burnout and anxiety; to the remote Alaskan backcountry on a demanding thirty-three-day hunting expedition to experience the rewilding secrets of one of the last rugged places on Earth; and more. Along the way, Easter uncovers a blueprint for

leveraging the power of discomfort that will dramatically improve our health and happiness, and perhaps even help us understand what it means to be human. The Comfort Crisis is a bold call to break out of your comfort zone and explore the wild within yourself.

transcendent time utah: Pagans and Christians in the City Steven D. Smith, 2018-11-15 Traditionalist Christians who oppose same-sex marriage and other cultural developments in the United States wonder why they are being forced to bracket their beliefs in order to participate in public life. This situation is not new, says Steven D. Smith: Christians two thousand years ago faced very similar challenges. Picking up poet T. S. Eliot's World War II-era thesis that the future of the West would be determined by a contest between Christianity and "modern paganism," Smith argues in this book that today's culture wars can be seen as a reprise of the basic antagonism that pitted pagans against Christians in the Roman Empire. Smith's *Pagans and Christians in the City* looks at that historical conflict and explores how the same competing ideas continue to clash today. All of us, Smith shows, have much to learn by observing how patterns from ancient history are reemerging in today's most controversial issues.

transcendent time utah: Learning Native Wisdom Gary Holthaus, 2008-05-30 Scientific evidence has made it abundantly clear that the world's population can no longer continue its present rate of consuming and despoiling the planet's limited natural resources. Scholars, activists, politicians, and citizens worldwide are promoting the idea of sustainability, or systems and practices of living that allow a community to maintain itself indefinitely. Despite increased interest in sustainability, its popularity alone is insufficient to shift our culture and society toward more stable practices. Gary Holthaus argues that sustainability is achievable but is less a set of practices than the result of a healthy worldview. *Learning Native Wisdom: Reflections on Subsistence, Sustainability, and Spirituality* examines several facets of societies -- cultural, economic, agricultural, and political -- seeking insights into the ability of some societies to remain vibrant for thousands of years, even in extremely adverse conditions and climates. Holthaus looks to Eskimo and other Native American peoples of Alaska for the practical wisdom behind this way of living. *Learning Native Wisdom* explains why achieving a sustainable culture is more important than any other challenge we face today. Although there are many measures of a society's progress, Holthaus warns that only a shift away from our current culture of short-term abundance, founded on a belief in infinite economic growth, will represent true advancement. In societies that value the longevity of people, culture, and the environment, subsistence and spirituality soon become closely allied with sustainability. Holthaus highlights the importance of language as a reflection of shared cultural values, and he shows how our understanding of the very word subsistence illustrates his argument. In a culture of abundance, the term implies deprivation and insecurity. However, as Holthaus reminds us, All cultures are subsistence cultures. Our post-Enlightenment consumer-based societies obscure or even deny our absolute dependence on soil, air, sunlight, and water for survival. This book identifies spirituality as a key component of meaningful cultural change, a concept that

Holthaus defines as the recognition of the invisible connections between people, their neighbors, and their surroundings. For generations, native cultures celebrated and revered these connections, fostering a respect for past, present, and future generations and for the earth itself. Ultimately, Holthaus illustrates how spirituality and the concept of subsistence can act as powerful guiding forces on the path to global sustainability. He examines the perceptions of cultures far more successful at long-term survival than our own and describes how we might use their wisdom to overcome the sustainability crisis currently facing humanity.

transcendent time utah: Regulating Religion Catharine Cookson, 2001-03-29 Jurisprudence regarding the free exercise of religion clause of the U.S. Constitution is in a state of confusion. There has been a series of rapid changes in the standard used by the Supreme Court to determine when a statute impermissibly restricts free exercise. The trend is now towards greater acceptance of government claims about the importance of regulation over religious practices. Here, Cookson challenges the wisdom of this judicial drift, and its false dichotomy between anarchy and a system that respects religious freedom. In its place she offers a new, practical approach to resolving free exercise conflicts that could be used in both federal and state courts. Cookson shows the reader how violations of religious freedom affect the community whose values are at stake.

transcendent time utah: Hunting Men Dave Smith, 2006-12-01 In *Hunting Men*, poet Dave Smith reasserts the validity of poetry in our times. With eloquence, grace, and a searching intelligence, Smith illuminates both poems and poets. Believing that great poetry cannot be divorced from an intimate, organic link to place, he builds a compelling case for the importance of southern poets. Like the hunters who taught Smith as a young man patience, observation, and willingness to rely on his senses, he leads readers on an expedition through a specific poetic place with a sure sense of direction and destination. Beginning with a discussion of southern poetry that seeks to define the form and its value for a global readership, the first of the book's three sections also includes reflections on Edgar Allan Poe, John Crowe Ransom, Robert Penn Warren, and James Dickey. In the second part, Smith focuses on contemporary poets Richard Hugo, Stephen Dunn, Stephen Dobyns, and Larry Levis, among others. In the final chapters, he examines how he came to be a poet and reflects on the nature and practice of poetry. Smith describes himself as a poet born and raised in the South but never entirely comfortable with the neighborhood or many of the public assumptions about southernness. By describing why southern poetry is important to him, he reveals why poetry matters to all of us as he asserts the moral weight of regional art. My success, if it occurs, will be to send readers to the books of the poets where the world, as they knew it, waits and is full of the delights of the unglimped and known.

transcendent time utah: *Works like a Charm* Robert O. McDonald, 2023-08-01 Works like a Charm addresses a simple question: Why are “incentives” everywhere now? From inducements to work harder at our jobs to tax rebates for corporations, “incentive” names a general theory of motivation—according to economists, we are incentive-driven creatures. Yet far from being a neutral generalization, this understanding of human behavior smuggles in a quintessentially economic way of seeing the world. Works like a Charm applies Jacques Lacan's psychoanalytic concept of retroactive causality to explain the metastasis of the language and logic of incentives: To discover an incentive is to place in the untouchable past an economic cause for a contextual, historical force. Tracing “incentive” from its roots in antiquity to its uptake by neoclassical and then Chicago-school economists, Robert O. McDonald diagnoses the spread of incentives across the social, cultural, and political field and warns readers of the dangers of handing over causality to the economists.

transcendent time utah: *Desert Notebooks* Ben Ehrenreich, 2020-07-07 Layering climate science, mythologies, nature writing, and personal experiences, this New York Times Notable Book presents a stunning reckoning with our current moment and with the literal and figurative end of time. Desert Notebooks examines how the unprecedented pace of destruction to our environment and an increasingly unstable geopolitical landscape have led us to the brink of a calamity greater than any humankind has confronted before. As inhabitants of the Anthropocene, what might some of our own histories tell us about how to confront apocalypse? And how might the geologies and ecologies of desert spaces inform how we see and act toward time—the pasts we have erased and paved over, this anxious present, the future we have no choice but to build? Ehrenreich draws on the stark grandeur of the desert to ask how we might reckon with the uncertainty that surrounds us and fight off the crises that have already begun. In the canyons and oases of the Mojave and in Las Vegas's neon apocalypse, Ehrenreich finds beauty, and even hope, surging up in the most unlikely places, from the most barren rocks, and the apparent emptiness of the sky. Desert Notebooks is a vital and necessary chronicle of our past and our present—unflinching, urgent—yet timeless and profound.

transcendent time utah: **The Lyceum and Public Culture in the Nineteenth-century United States** Angela G. Ray, 2005 Angela Ray provides a refreshing new look at the lyceum lecture system as it developed in the United States from the 1820s to the 1880s. She argues that the lyceum contributed to the creation of an American public at a time when the country experienced a rapid change in land area, increasing immigration, and a revolution in transportation, communication technology, and social roles. The history of the lyceum in the nineteenth century illustrates a process of expansion, diffusion, and eventual commercialization. In the late 1820s, a politically and economically dominant culture--the white Protestant northeastern middle class--institutionalized the practice of public debating and public lecturing for education and moral uplift. In the 1820s and 1830s, the lyceum was characterized by organized groups in cities and towns, particularly in the Northeast and the Old Northwest (now the Midwest). These groups were established to promote debate, to create a setting for study, and to provide a forum for members' lecturing. By the 1840s and 1850s, however, most lyceums concentrated on the sponsorship of public lectures, presented for institutional profit as well as public instruction and entertainment. Eventually, lyceum lectures

became a commercial enterprise and desirable platform for celebrities who wished to expand their incomes from lecturing.

transcendent time utah: Source Code Meditation Michael Cotton, 2018-05-22 Learn to mobilize latent energy in your body and direct it to energize and awaken your higher brain • Provides a simplified step-by-step guided process to the higher-brain activation techniques of Source Code Meditation • Explains how to shift energy out of the lower “survive” brain into the higher “thrive” brain to bring confidence, clarity, and empowerment for transformative change in all areas of life • Reveals how the “brain first” techniques of SCM tune the brain to receive meditation, enabling access to deep flow states, transcendent states of consciousness, and higher brain potential The human brain is like a flowing river of potential. Until now, that river has been blocked, barricaded, and diverted by the primitive lower brain. The lower brain hijacks our ability to experience deeper flow and higher transcendent states of consciousness. It also guards against the full expression of the passionate human heart. Source Code Meditation (SCM), with its nine summits of transformation, effortlessly re-routes that lower brain diversion, allowing you to activate latent energy in your body, awaken your higher brain, enlighten your mind, and set your heart on fire to create a new world. With traditional meditation techniques, it often takes decades of practice for hours each day to confer significant changes in the mind and the higher brain. Few of us make it to these rarified states of mind, due to the amount of time and the intensity of focus needed. With “brain first” SCM techniques, you mobilize latent energy in the body and direct it to energize and awaken the higher brain before meditation begins. With the higher brain prepped and tuned, meditation is efficiently received, leading to quantum breakthroughs in higher consciousness without years of practice as well as access to deep flow states, transcendent states of consciousness, and higher brain potential. Providing a simplified step-by-step guided process to SCM, Dr. Michael Cotton explains how to shift energy out of the lower “survive” brain into the higher “thrive” brain to bring confidence, clarity, and empowerment for transformative change in all areas of life. Distilled from the world’s most comprehensive philosophy, Integral Metatheory, SCM offers not only a way to create the brain state necessary to change the mind, but the crystal clarity needed to use these advanced meditative states to actualize your potential and live your destiny to the fullest.

transcendent time utah: Shooting Polaris John Hales, 2013-04-24 Shooting Polaris is John Hales’s fascinating and far-reaching account of working as a government surveyor in the southern Utah desert. In it, he describes his search for a place in the natural world, beginning with an afternoon spent tracking down a lost crew member who cracked up on the job and concluding with his supervising a group of at-risk teenagers on a backpacking trip in the Escalante wilderness. In between, he depicts a range of experiences in and outside nature, including hostile barroom encounters between surveyors and tourists, weekends spent climbing Navajo Mountain and floating what remains of Glen Canyon, and late-night arguments concerning the meaning and purpose of nature with the eccentric polygamist who ran the town in which the surveyors parked their bunk trailers. Although this work is autobiographical, Shooting Polaris is so much more. It is a reflection on man’s relationship to nature and work, American history and the movement into the West, the desire to impose order and the contrary impulse for unmediated experience, the idealistic legacy of the sixties, the influence of the Mormon Church, and the often-antagonistic relationship of American capitalism to sound ecological management. Along the way, Hales introduces engaging characters and reveals the art, science, and history of surveying, an endeavor that turns out to be surprisingly profound.

The senses are gateways of knowledge, instruments of power, sources of pleasure and pain - and they are subject to dramatically different constructions

in different societies and periods. *Empire of the Senses* charts the new terrains opened up by the sensual revolution in scholarship, as it takes the reader into the sensory worlds of the medieval witch and the postmodern mall, a Japanese tea ceremony and a Boston shelter for the homeless. This compelling revisioning of history and cultural studies sparkles with wit and insight and is destined to become a landmark in the field.

transcendent time utah: Tanking to the Top Yaron Weitzman, 2020-03-17 Enter the City of Brotherly Love and see how the NBA's Philadelphia 76ers trusted The Process—using a bold plan to get to first by becoming the worst. When a group of private equity bigwigs purchased the Philadelphia 76ers in 2011, the team was both bad and boring. Attendance was down. So were ratings. The Sixers had an aging coach, an antiquated front office, and a group of players that could best be described as mediocre. Enter Sam Hinkie—a man with a plan straight out of the PE playbook, one that violated professional sports' Golden Rule: You play to win the game. In Hinkie's view, the best way to reach first was to embrace becoming the worst—to sacrifice wins in the present in order to capture championships in the future. And to those dubious, Hinkie had a response: Trust The Process, and the results will follow. The plan, dubbed The Process, seems to have worked. More than six years after handing Hinkie the keys, the Sixers have transformed into one of the most exciting teams in the NBA. They've emerged as a championship contender with a roster full of stars, none bigger than Joel Embiid, a captivating seven-footer known for both brutalizing opponents on the court and taunting them off of it. Beneath the surface, though, lies a different story, one of infighting, dueling egos, and competing agendas. Hinkie, pushed out less than three years into his reign by a demoralized owner, a jealous CEO, and an embarrassed NBA, was the first casualty of The Process. He'd be far from the last. Drawing from interviews with nearly 175 people, *Tanking to the Top* brings to life the palace intrigue incited by Hinkie's proposal, taking readers into the boardroom where the Sixers laid out their plans, and onto the courts where those plans met reality. Full of uplifting, rags-to-riches stories, backroom dealings, mysterious injuries, and burner Twitter accounts, *Tanking to the Top* is the definitive, inside story of the Sixers' Process and a fun and lively behind-the-scenes look at one of America's most transgressive teams. Including exclusive interviews with Joel Embiid, Ben Simmons, and Coach Brett Brown, Sam Hinkie, and more.
