

# Training With Chung Li

## **Training with Chung Li: Mastering the Iron Will and Jade Dragon**

Are you ready to unlock the full potential of Chung Li, the Geo Archon, in Genshin Impact? This comprehensive guide dives deep into effective training strategies for this powerful character, covering everything from optimal team compositions to mastering his elemental skills and burst. Whether you're a seasoned player looking to refine your Chung Li gameplay or a newcomer eager to learn the ropes, this post provides actionable advice to help you dominate the battlefield with the Geo Archon himself. Let's get started on your journey to mastering training with Chung Li!

## **Understanding Chung Li's Kit: A Foundation for Success**

Before diving into specific training methods, it's crucial to understand Chung Li's unique abilities. He's not your typical DPS character; his strength lies in his exceptional support capabilities and his surprisingly potent shielding.

### **Mastering the Jade Shield:**

Chung Li's Elemental Skill, "Dominus Lapidis," creates a powerful Geo shield, the cornerstone of his gameplay. Effective training involves learning to:

Time your shield perfectly: Anticipate incoming attacks and deploy the shield just before impact for maximum protection. Practice against various enemy types and attack patterns to refine your timing.

Maximize shield strength: The shield's strength scales with Chung Li's Base HP. Investing in artifacts and weapons that boost HP is crucial for creating an impenetrable defense.

Utilizing shield reactions: While the shield itself isn't directly involved in reactions, it allows your team to survive long enough to trigger beneficial elemental reactions, turning the tide of battle.

## **Harnessing the Power of Planet Befall:**

Chung Li's Elemental Burst, "Planet Befall," is a devastating area-of-effect Geo attack. Effective training involves understanding:

Optimal positioning: Learn the AoE radius of Planet Befall to maximize the number of enemies hit. Experiment with different distances and angles to find the most efficient positioning.

Combining with other elements: While Geo is not known for its reaction potential, Planet Befall can set up opportunities for other characters to trigger Cryo, Hydro, or Pyro reactions with enemies caught in its area of effect.

Using the burst strategically: Don't just spam it. Learn to use Planet Befall as a finisher, clearing out weakened enemies or disrupting larger groups.

## **Building the Perfect Chung Li: Artifact and Weapon Choices**

Your choice of artifacts and weapons significantly impacts Chung Li's performance.

### **Optimal Artifact Sets:**

For a support-oriented Chung Li, the Ocean-Hued Clam set is generally preferred for its ability to heal the team based on shield strength. Alternatively, the Retracing Bolide set provides a substantial shield strength bonus and damage increase while shielded. For a more DPS-focused build, consider the Husk of Opulent Dreams set to capitalize on HP scaling.

### **Weapon Selection:**

Chung Li's weapon choices depend on your build. High HP weapons such as the White Tassel (easily craftable) or the Black Tassel (event weapon) are excellent for a support-focused Chung Li maximizing his shield strength. For a more offensive build, weapons that provide HP% or ATK% are

good alternatives, with 5-star options like the Primordial Jade Winged-Spear offering significant boosts.

## **Team Composition Synergies: Maximizing Chung Li's Support Role**

Chung Li excels as a support character. Pairing him with characters that benefit from his shield and Geo application is key.

### **Examples of Effective Teams:**

Team 1 (Melt Team): Chung Li (Shield), Ganyu (Main DPS), Xiangling (Pyro Sub-DPS), Venti/Sucrose (Crowd Control)

Team 2 (Vaporize Team): Chung Li (Shield), Hu Tao (Main DPS), Xingqiu (Hydro Sub-DPS), Fischl/Kazuha (Electro/Anemo Sub-DPS)

Team 3 (Mono Geo Team): Ningguang, Albedo, Zhongli, Noelle

## **Advanced Techniques and Gameplay Strategies**

Mastering Chung Li requires more than just understanding his kit. Consider these advanced techniques:

Using the shield to interrupt enemy attacks: Precisely timed shield activations can interrupt enemy attacks, creating openings for your team to deal damage.

Managing stamina: While not heavily reliant on stamina, learning to efficiently manage it allows for more precise shield deployments.

Utilizing the pillar: The pillar created by Chung Li's Elemental Skill can be used strategically to block projectiles and create cover.

## **Conclusion**

Training with Chung Li is a journey of mastering both his defensive and offensive capabilities. By understanding his kit, optimizing your artifact and weapon choices, and developing effective team compositions, you can unlock his true potential. Remember to practice consistently and experiment with different strategies to find what works best for your playstyle. With dedication and practice, you will become a master of the Geo Archon and dominate the battlefield!

# FAQs

1. Is Chung Li a good main DPS? While capable of dealing damage, Chung Li is most effective as a support character due to his exceptional shielding and Geo application.
2. What are the best artifacts for a support Chung Li? The Ocean-Hued Clam and Retracing Bolide sets are generally preferred for support builds, maximizing shield strength and providing additional team utility.
3. How can I improve my shield timing? Practice consistently against various enemy types and attack patterns. Focus on anticipating attacks and deploying the shield just before impact.
4. Which weapons are best for a DPS Chung Li? Weapons that provide a significant boost to HP% or ATK% are preferred, such as the Primordial Jade Winged-Spear or Staff of Homa.
5. Can Chung Li be used in any team composition? While adaptable, Chung Li's effectiveness is maximized when paired with characters that benefit from his shielding and Geo application. Experiment to find synergistic team compositions.

**training with chung li: The Oxford Handbook of Developmental Psychology, Vol. 1** Philip David Zelazo, 2013-03-21 This handbook provides a comprehensive survey of what is now known about psychological development, from birth to biological maturity, and it highlights how cultural, social, cognitive, neural, and molecular processes work together to yield human behavior and changes in human behavior.

**training with chung li: Knowledge-Based Intelligent Information and Engineering Systems** Robert J. Howlett, 2005-08-30 Annotation The four volume set LNAI 3681, LNAI 3682, LNAI 3683, and LNAI 3684 constitute the refereed proceedings of the 9th International Conference on Knowledge-Based Intelligent Information and Engineering Systems, KES 2005, held in Melbourne, Australia in September 2005. The 716 revised papers presented were carefully reviewed and selected from nearly 1400 submissions. The papers present a wealth of original research results from the field of intelligent information processing in the broadest sense; topics covered in the first volume are intelligent design support systems, data engineering, knowledge engineering and ontologies, knowledge discovery and data mining, advanced network application, approaches and methods of security engineering, chance discovery, information hiding and multimedia signal processing, soft computing techniques and their applications, intelligent agent technology and applications, smart systems, knowledge - based interface systems, intelligent information processing for remote sensing, intelligent human computer interaction systems, experience management and knowledge management, network (security) real-time and fault tolerant systems, advanced network application and real-time systems, and intelligent watermarking algorithms.

**training with chung li: Street Fighter Legends Chun-Li** Ken Siu-Chong, He is the world's most feared martial artist, mentioned only in whispers. Few have dared to challenge him, and even fewer have survived to speak of the nightmare. He is Akuma -- Master of the Fist, wielder of the Dark Hado. But he was not always trapped on the path of chaos. Street Fighter Origins: Akuma reveals the secrets of this dark figure's past for the first time, and shows how a frustrated young man grew into a mad demon. Presenting UDON's first-ever, book length original graphic novel! The story fans have demanded for years is finally here!

**training with chung li: Exercise on Brain Health** , 2019-10-11 Exercise on Brain Health, Volume 147 in the International Review of Neurobiology series, highlights new advances in the field,

with this new volume presenting interesting chapters on Exercise on bipolar disorder in humans, Exercise on Parkinson's disease in humans, Exercise on spinal cord injury in animals, Exercise on spinal cord injury in humans, Exercise promotes synaptic plasticity, Exercise promotes neural connectivity, Exercise on spinogenesis, Peripheral-central crosstalk of exercise on brain health, Exercise and Parkinson's, Exercise on binge alcohol consumption, Exercise on depression, and Exercise on chronic fatigue syndrome, and more. - Provides the authority and expertise of leading contributors from an international board of authors - Summarizes the neuroprotective effects of physical exercise interventions on different brain disorders/injuries - Provides clinical and pre-clinical evidence showing how effective physical exercise is neuroprotective

**training with chung li: Advances in Information Technology Research and Application: 2012 Edition** , 2012-12-26 Advances in Information Technology Research and Application / 2012 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Information Technology. The editors have built Advances in Information Technology Research and Application / 2012 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Information Technology in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Advances in Information Technology Research and Application / 2012 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

**training with chung li: Advances in Multimedia Information Processing — PCM 2001** Heung-Yeung Shum, Hong-Yuan Mark Liao, Shih-Fu Chang, 2003-06-30 Welcome to the second IEEE Pacific Rim Conference on Multimedia (IEEE PCM 2001) held in Zhongguanchun, Beijing, China, October 22 24, 2001. Building upon the success of the inaugural IEEE PCM 2000 in Sydney in December 2000, the second PCM again brought together the researchers, developers, practitioners, and educators of multimedia in the Pacific area. Theoretical breakthroughs and practical systems were presented at this conference, thanks to the sponsorship by the IEEE Circuit and Systems Society, IEEE Signal Processing Society, China Computer Foundation, China Society of Image and Graphics, National Natural Science Foundation of China, Tsinghua University, and Microsoft Research, China. IEEE PCM 2001 featured a comprehensive program including keynote talks, regular paper presentations, posters, demos, and special sessions. We received 244 papers and accepted only 104 of them as regular papers, and 53 as poster papers. Our special session chairs, Shin'ichi Satoh and Mohan Kankanhalli, organized 6 special sessions. We acknowledge the great contribution from our program committee members and paper reviewers who spent many hours reviewing submitted papers and providing valuable comments for the authors. The conference would not have been successful without the help of so many people. We greatly appreciated the support of our honorary chairs: Prof. Sun Yuan Kung of Princeton University, Dr. Ya Qin Zhang of Microsoft Research China, and Prof.

**training with chung li: Uncaged** Frank Shamrock, Charles Fleming, Mickey Rourke, 2012-10-01 Frank Shamrock may be the toughest man alive. The veteran cage fighter—his &“extreme fighting&” style involves aspects of boxing, kickboxing, wrestling, karate, Brazilian jujitsu, and even Southeast Asian Muay Thai—is the only person to win a title in all three major North American fight promotions. As Ultimate Fighting Champion he was widely regarded as the best pound-for-pound fighter in the world. But Shamrock has led a life of profound, even Dickensian, difficulty. Born Frank Alicio Juarez III, he suffered through a childhood of abuse, neglect, and molestation before sliding into juvenile delinquency and petty crime. After finding some refuge in the penal system, he was eventually taken in by Bob Shamrock, a Northern California man who had fostered hundreds of lost boys—among them Frank's adoptive older brother, Ken, also a champion MMA fighter. An early marriage followed, and an unplanned pregnancy. When Frank couldn't afford

to support his family, he turned to burglary and wound up in state prison—a fact he has never, until now, discussed publicly. But when he was released, Frank joined Ken in training as a cage fighter. For the next two decades he dominated the entire sport. This riveting book tells his whole story. Shamrock gives vivid accounts of his fights, both in and out of the ring. He explains his losses and discloses what enabled him to become a champion. He credits the fighters who taught and inspired him and points out the weaknesses of many who didn't. He details his beef with the UFC and the reasons behind his retirement. He tells all about the violence, the injuries, the booze—and how he overcame them all to become a champion in every sense of the word.

**training with chung li:** Prof. Jun Yeh, Tallinn University of Technology, Estonia, 2014-07-07  
amount of new knowledge every day. We have to acknowledge that even the smartest people among us are incapable of familiarizing himself with all these new data. Fortunately, we are only required to deal with a very small amount of that vast number in our work and life. As those who devote himself to the field of information technology and management engineering, I sincerely believe that it is our responsibility to make efforts to accelerate the advance of science in such fields. The 2014 international Conference on Information Technology and Management Engineering, thanks to the hard work of its committee, will be held on April 26 and 27 in Hong Kong. The ITME2014 covers a wide range of topics such as network protocols, information theory and coding theory, network security, management theory, project management, public management, knowledge management etc. It is a great honor to us that numerous people from various countries, including many famous experts and excellent researchers, have shown their interest in this convention and submitted their latest studies to us as their support. Among these studies, we have selected about a hundred to be finally included in this proceeding after reviewing and discussing. We believe that this collection of work will be of great value not only to the participants of ITME2014, but also to those who has a chance of meeting it. The publication of this conference proceedings and the successful opening of ITME2014 owe its credit to a lot of people and institutions, especially the ITME2014 committee, the editors and DEStech Publications. The committee has devoted much time to reviewing the papers submitted to ITME2014, and DEStech Publications publishing those accepted papers. I would like to thank the committee and the press deeply here for their support to ITME2014 and I am eagerly looking forward to another chance for us to be a team again. Finally, let's wish together that the 2014 International Conference on Information Technology

The total of 1578 papers and 396 posters included in the HCII 2023 proceedings volumes was carefully reviewed and selected from 7472 submissions. The HCIBGO 2023 proceedings focuses in topics such as artificial intelligence and machine learning, blockchain, service design, live streaming in electronic commerce, visualization, and workplace design.

**training with chung li: Rethinking Social Capital and Entrepreneurship in Greater China** Jenn-Hwan Wang, Ray-May Hsung, 2016-05-05 Family networks and wider personal social relationships - guanxi - have long been held to be a significant factor making for the success of many Chinese family businesses, and guanxi is often seen as a special characteristic which shapes the nature of all business in China. This book re-examines this proposition critically, bringing together the very latest research and comparing the situation in different parts of Greater China - mainland China, Taiwan and Hong Kong. It considers entrepreneurship, venture capital, intergenerational succession, disputes, family businesses in different sectors of the economy, and particular family businesses. Among the book's many interesting conclusions is the observation that guanxi capitalism has evolved in different ways in the different parts of Greater China, with the particular institutional setting having a major impact.

**training with chung li: Hwa Yu Tai Chi Ch'uan** Glenn D. Newth, 2006 The basis for many of the family styles, Hwa Yu T'ai Chi Ch'uan is more than 1,000 years old, but remained a closed style until quite recently. This comprehensive, practical guide explains this unique and sophisticated kinesthetic form in detail. The book contains step-by-step instructions and photo sequences that illustrate forms practice, fighting applications, and push hands; a thorough explanation of the form's philosophical and theoretical basis; and an overview of the many health benefits of this ancient art.

**training with chung li: The Encyclopedia of Martial Arts Movies** Bill Palmer, Karen Palmer, 1995 The Encyclopedia covers the genre from 1920 to 1994. The genre, however, can be very confusing: films often have several titles, and many of the stars have more than one pseudonym. In an effort to clarify some of the confusion, the authors have included all the information available to them on almost 3,300 films. Each entry includes a listing of the production company, the cast and crew, distributors, running times, reviews with star ratings whenever possible, and alternate film titles. A list of film series and one of the stars' pseudonyms, in addition to a 7,900 name index, are also included. Illustrated.

**training with chung li: 2014 International Conference on Mechanical Design, Manufacture and Automation Engineering (MDMAE2014)** D. P. Yasin, 2014-02-04 Automation Engineering (MDMAE2014) is to provide a platform for all researchers in the field of Mechanical, Manufacture, Automation and Material Engineering to share the most advanced knowledge from both academic and industrial world, and to communicate with each other about their experiences and the most up-to-date research achievements, discussing forward issues and future prospects, seeking a better way to solve practical problems in this fields. As the first international conference on MDMAE, consisting of five main topics: Mechanical Engineering, Automation Engineering, Manufacturing Systems, Materials Engineering and Measurement and Test, which offer attendees free space to present their inspiring works and academic achievements mixed with the atmosphere of industry and academia, it has attracted many scholars, researchers and practitioners in these fields from various countries to get together in this conference, sharing their latest research achievements with each other , enriching their professional knowledge and broadening their horizons as well.

**training with chung li: A Cultural History of Civil Examinations in Late Imperial China**

Benjamin A. Elman, 2000-03-22 In this multidimensional analysis, Benjamin A. Elman uses over a thousand newly available examination records from the Yuan, Ming, and Ch'ing dynasties, 1315-1904, to explore the social, political, and cultural dimensions of the civil examination system, one of the most important institutions in Chinese history. For over five hundred years, the most important positions within the dynastic government were usually filled through these difficult examinations, and every other year some one to two million people from all levels of society attempted them. Covering the late imperial system from its inception to its demise, Elman revises our previous understanding of how the system actually worked, including its political and cultural machinery, the unforeseen consequences when it was unceremoniously scrapped by modernist reformers, and its long-term historical legacy. He argues that the Ming-Ch'ing civil examinations from 1370 to 1904 represented a substantial break with T'ang-Sung dynasty literary examinations from 650 to 1250. Late imperial examinations also made Tao Learning, Neo-Confucian learning, the dynastic orthodoxy in official life and in literati culture. The intersections between elite social life, popular culture, and religion that are also considered reveal the full scope of the examination process throughout the late empire.

**training with chung li: Seven Taoist Masters**, 2004-10-26 History and legend are

interwoven in this classic folk novel that both entertains and explores the philosophy and practices of Taoism Written by an unknown author, Seven Taoist Masters is the story of six men and one woman who overcome tremendous hardships on the journey to self-mastery. These characters and their teacher, Wang Ch'ung-yang, are all historical figures who lived in the Southern Sung (1127-1279) and Yuan (1271-1368) dynasties. Wang is regarded as the greatest patriarch of the Complete Reality school, a highly purified branch of Taoism having a strong affinity with Zen Buddhism. At once an entertaining novel and a Taoist training manual, Seven Taoist Masters brings to life the essentials of Taoist philosophy and practice, both through the instructions offered by Wang—on topics such as the cultivation of mind and body, meditation techniques, and overcoming the obstacles to enlightenment—and through the experiences of its unforgettable characters.

**training with chung li: Global Perspective for Competitive Enterprise, Economy and Ecology**

Shuo-Yan Chou, Amy J. C. Trappey, Jerzy Pokojski, Shana Smith, 2009-07-01 Global Perspective for Competitive Enterprise, Economy and Ecology addresses the general theme of the Concurrent

Engineering (CE) 2009 Conference – the need for global advancements in the areas of competitive enterprise, economy and ecology. The proceedings contain 84 papers, which vary from the theoretical and conceptual to the practical and industrial. The content of this volume reflects the genuine variety of issues related to current CE methods and phenomena. Global Perspective for Competitive Enterprise, Economy and Ecology will therefore enable researchers, industry practitioners, postgraduate students and advanced undergraduates to build their own view of the inherent problems and methods in CE.

**training with chung li: Applied Degree Education and the Future of Work** Christina Hong, Will W. K. Ma, 2020-05-16 This edited volume sets the stage for discussion on Education 4.0, with a focus on applied degree education and the future of work. Education 4.0 refers to the shifts in the education sector in response to Industry 4.0 where digital transformation is impacting the ways in which the world of work and our everyday lives are becoming increasingly automated. In the applied degree sector, significant change and transformation is occurring as leaders, educators and partners evolve smart campus environments to include blended learning, artificial intelligence, data analytics, BYOD devices, process automation and engage in curriculum renewal for and with industries and professions. This volume aims to profile and enhance the contribution of applied educational practice and research particularly in the applied degree sector and includes contributions that show case real world outcomes with students and industry as partners. This edited volume includes a wide range of topics, such as rethinking the role of education and educators; curriculum and the future of work; industrial partnership, collaboration and work integrated learning; vocational and professional practices; students, industry and professions as partners; employability skills and qualities for the 21st century world of work; innovative pedagogy and instructional design; adaptive learning technologies; and data analytics, assessment and feedback. The contributors come from different parts of the world in higher education, including, Canada, China, Finland, Germany, Hong Kong, Italy, Macau, Singapore and the United Kingdom.

**training with chung li: Pervasive Computing and the Networked World** Qiaohong Zu, Bo Hu, Atilla Elci, 2013-03-14 This book constitutes the refereed post-proceedings of the Joint International Conference on Pervasive Computing and the Networked World, ICPCA-SWS 2012, held in Istanbul, Turkey, in November 2012. This conference is a merger of the 7th International Conference on Pervasive Computing and Applications (ICPCA) and the 4th Symposium on Web Society (SWS). The 53 revised full papers and 26 short papers presented were carefully reviewed and selected from 143 submissions. The papers cover a wide range of topics from different research communities such as computer science, sociology and psychology and explore both theoretical and practical issues in and around the emerging computing paradigms, e.g., pervasive collaboration, collaborative business, and networked societies. They highlight the unique characteristics of the everywhere computing paradigm and promote the awareness of its potential social and psychological consequences.

**training with chung li: Future Trends in Biomedical and Health Informatics and Cybersecurity in Medical Devices** Kang-Ping Lin, Ratko Magjarevic, Paulo de Carvalho, 2019-09-27 This book gathers the proceedings of the IV International Conference on Biomedical and Health Informatics (ICBHI 2019), held on 17-20 April, 2019, in Taipei, Taiwan. Contributions span a range of topics, including medical imaging, biosignal processing, biodata management and analytics, public and personalized health systems, mobile health applications and many more. The IV conference edition gave a special emphasis to cybersecurity issues and cutting-edge medical devices, as it is reflected in this book, which provides academics and professionals with extensive knowledge on and a timely snapshot of cutting-edge research and developments in the field of biomedical and health informatics.

**training with chung li: Advances in Neural Networks - ISNN 2008** Fuchun Sun, Jianwei Zhang, Jinde Cao, Wen Yu, 2008-09-20 The two volume set LNCS 5263/5264 constitutes the refereed

proceedings of the 5th International Symposium on Neural Networks, ISNN 2008, held in Beijing, China in September 2008. The 192 revised papers presented were carefully reviewed and selected from a total of 522 submissions. The papers are organized in topical sections on computational neuroscience; cognitive science; mathematical modeling of neural systems; stability and nonlinear analysis; feedforward and fuzzy neural networks; probabilistic methods; supervised learning; unsupervised learning; support vector machine and kernel methods; hybrid optimisation algorithms; machine learning and data mining; intelligent control and robotics; pattern recognition; audio image processing and computer vision; fault diagnosis; applications and implementations; applications of neural networks in electronic engineering; cellular neural networks and advanced control with neural networks; nature inspired methods of high-dimensional discrete data analysis; pattern recognition and information processing using neural networks.

**training with chung li: Cooperative Localization and Navigation** Chao Gao, Guorong Zhao, Hassen Fourati, 2019-08-21 This book captures the latest results and techniques for cooperative localization and navigation drawn from a broad array of disciplines. It provides the reader with a generic and comprehensive view of modeling, strategies, and state estimation methodologies in that fields. It discusses the most recent research and novel advances in that direction, exploring the design of algorithms and architectures, benefits, and challenging aspects, as well as a potential broad array of disciplines, including wireless communication, indoor localization, robotics, emergency rescue, motion analysis, etc.

**training with chung li: Neurovascular Neuropsychology** Ronald M. Lazar, MaryKay A. Pavol, Jeffrey N. Browndyke, 2020-08-29 This book covers the explosion of new information about the relationship between the brain and its blood supply since the first edition was published in 2009. With new knowledge and its impact on clinical care, neurovascular neuropsychology has become a recognized sub-specialty that has been integrated into health care systems in the US and abroad. The second edition brings to this larger audience the latest word on these matters, with new emphasis on women's issues, relevance to the pediatric population, insights from modern imaging, and advances in medical and surgical treatments such as heart transplantation, cardiovascular transarterial therapies, and noninvasive brain stimulation in connection with neurocognitive outcomes.
